Sustainable Policy Applications for Social Ecology and Development Carayannis, Elias G.,2012-05-31 Social ecology is a philosophy rooted in deep seated social problems particularly in hierarchical political and social systems Social ecologists throughout the world maintain a theory that present ecological problems cannot be clearly understood much less resolved without resolutely dealing with problems within society Therefore social ecology locates the roots of these ecological crises firmly in the relations of domination between people Sustainable Policy Applications for Social Ecology and Development establishes a new set of platforms for intellectual discourse and identification of critical and strategic emerging issues the formulation of cogent and useful policies and practice recommendations This publication highlights provocative but scholarly views that diverge from the current conventional wisdom taking into consideration the concepts of robust competitiveness sustainable entrepreneurship and democratic capitalism central to its philosophy and objectives The aim of this book is to highlight emerging research and practice at the dynamic intersection of these fields where individuals organizations industries regions and nations are harnessing creativity and invention to achieve and sustain growth

Advances in Computer, Information, and Systems Sciences, and Engineering Khaled Elleithy,Tarek Sobh,Ausif Mahmood,Magued Iskander,Mohammad A. Karim,2007-06-06 The conference proceedings of International Conference on Industrial Electronics Technology not only the reviewing submissions and registration processes but also the actual conference Conference participants authors presenters and attendees only needed an internet connection and sound available on their computers in order to be able to contribute and participate in this international ground breaking conference The on line structure of this high quality event allowed academic professionals and industry participants to contribute work and attend world class technical presentations based on rigorously refereed submissions live without the need for investing significant travel funds or time out of the office Suffice to say that CISSE received submissions from more than 50 countries for whose researchers this opportunity presented a much more affordable dynamic and well planned event

to attend and submit their work to versus a classic on the ground conference The CISSE conference audio room provided superb audio even over low speed internet connections the ability to display PowerPoint presentations and cross platform compatibility the conferencing software runs on Windows Mac and any other operating system that supports Java In addition the conferencing system allowed for an unlimited number of participants which in turn granted CISSE the opportunity to allow all participants to attend all presentations as opposed to limiting the number of available seats for each session The implemented conferencing technology starting with the submission review system and ending with the online conferencing capability allowed CISSE to conduct a very high quality fulfilling event for all participants See www.cissee2005.org sections

Corrupted Jonathan D Jansen, 2023-02 Through investigatory reports and interviews Jonathan Jansen reveals the structural conditions for chronic dysfunction in a sample of South African universities He reveals the political economy at work and the intense competition for resources on campuses He also provides interventions for these fragile institutions Why do some universities seem to be in a constant state of turmoil and dysfunction Jonathan Jansen explores the root causes of chronic instability in a sample of South African universities Through scrutiny of investigatory reports and interviews with more than 100 university managers and government officials Jansen finds that at the heart of the dysfunction in universities is an intense and sometimes deadly competition for resources especially on campuses located in impoverished communities It is not the lack of institutional resources but their concentration in a university that draws a mix of corrupt actors from local politicians and taxi operators to members of council and management into a never ending run on the material such as money for infrastructure and symbolic namely graduation certificates for sale assets of these institutions Jansen argues that the problem won't be solved through investments in capacity building alone because the combination of institutional capacity and institutional integrity contributes to serial instability in universities Jansen makes an important intervention to understanding the root causes and offers interventions to produce stabilities such as the depoliticisation of university councils and appointing academics of integrity and capacity in the management and leadership of these fragile institutions This groundbreaking and long overdue study will offer a promising way forward for universities to better serve their

communities and the country more broadly Emerging Technologies in Non-Destructive Testing V Alkiviadis S. Paipetis, Theodore E. Matikas, Dimitrios G. Aggelis, Danny Van Hemelrijck, 2012-01-26 Non destructive evaluation NDE methods have dominated most of the fields of applied research and technology over the last twenty years These techniques provide information on the functional efficiency of materials and structures without causing any structural impact on the structure itself Their use enables the monitoring of the structural integrity the structural condition as well as the service induced degradation of materials and structures during their service life In this respect they address a vast field of applications ranging from the aerospace and automotive industry to civil engineering structures and material quality control This volume comprises scientific papers presented during the Fifth Conference on Emerging Technologies in Non Destructive Testing Ioannina Greece 19 21 September 2011 A broad spectrum of related research was presented during the course of the conference including optical acoustic thermal electrical and electromagnetic methods together with imaging tomographic and signal processing techniques Special attention was given to NDE for Civil Engineering Structures and for the first time in the conference series a multiple session on NDE for the protection of cultural heritage was organized Emerging Technologies in Non Destructive Testing V contains contributions by experts in this field from 22 different countries worldwide Reflecting the state of the art in Non Destructive Evaluation the book will prove to be a valuable companion to students engineers and industrial partners who are active in the field of non destructive evaluation and testing This volume will also provide students and researchers with insight into the focal points of contemporary research efforts in the field of non destructive evaluation
