Application of LC-MS/MS in the Mycotoxins Studies Laura Gámiz-Gracia, Ana M. García-Campaña, Natalia Arroyo-Manzanares, 2020-06-17 Mycotoxins are secondary metabolites produced by the fungi of different species mainly *Aspergillus*, *Fusarium* and *Penicillium* with toxic effects for humans and animals. These mycotoxins can contaminate food and feed. The European Union (EU) has established the maximum permitted or recommended levels for well known mycotoxins in different foodstuffs. However, there are other mycotoxins that are not included in the regulations, the emerging mycotoxins whose toxicity is still not clear and the modified or masked mycotoxins produced as a consequence of a detoxification strategy of the host plant of the fungus or during food processing. These mycotoxins could pose a risk and should also be taken into account. In order to assure consumers' health, analytical methods for the accurate determination of mycotoxins in different food matrices and feeds are required. In this sense, liquid chromatography tandem mass spectrometry (LC-MS/MS) is a powerful tool for their unique identification and quantification. Moreover, the use of high resolution mass spectrometry (HRMS) allows one to identify novel mycotoxins and targeted/untargeted approaches for study. This Special Issue compiles recent applications of LC-MS/MS in mycotoxin studies as well as the development and validation of new analytical methods for their identification and quantification in different food matrices and feed occurrence studies and the biomonitoring of mycotoxins and their metabolites in biological fluids.

As the first volume in North West University's Community based Educational Research Series it focuses on transforming education through a participatory approach. The authors explore quality education across early childhood, primary, secondary and higher education by examining collaborative efforts among practitioners, parents and teachers. This scholarly book provides empirical evidence on how collaborative initiatives can promote sustainable development. These initiatives encourage partnerships among community leaders, educators, learners, nongovernmental organisations, government and the private sector for lifelong learning and professional development. It highlights southern African experiences in collaborative education aligned with the United Nations sustainable development goal of achieving quality education. The book demonstrates various research designs and methods applied to educational practice from early childhood to tertiary levels through empirical research and community projects.

Mother Earth, Mother Africa and Mission Seblewengel Daniel, Mmapula Diana Kebaneilwe, Angeline Savala, 2021-07-01. The volume is significant in bringing together voices of African women theologians and their allies on the urgent topic of ecology. First, it decisively intervenes into scholarly discourses on ecofeminism by highlighting the reflections of African women scholars and African women as subjects. This function of the volume is very important both at local and global levels. Second, it contributes to contextualizing of scriptural interpretation around the issue of ecology. Biblical reflection occurs throughout the volume and is put into dialogue with African traditions with ecofeminism with Africa based mission projects and with the current crisis of sustainability and African women's roles in protecting the earth. Third, the volume includes several concrete case studies based on interviews and grassroots qualitative research as well as especially original articles that integrate biblical exegesis of Genesis with reflections on patriarchal legal systems in Botswana and an original take on male headship in relation to ecofeminism.
