

The book cover features a vibrant illustration of a space shuttle launching. The shuttle is white with a yellow-orange boosters section and is angled upwards towards the top left. A large plume of white smoke and fire trails behind it. In the background, a launch pad structure is visible. The sky transitions from a deep blue at the top to a lighter blue and white near the horizon. The title 'Applied Circuit Analysis' is written in a large, white, sans-serif font, while 'solution manual' is in a smaller, red, sans-serif font. The authors' names are listed at the bottom in a small, white, sans-serif font.

Symbolic Analysis for Automated Design of Analog Integrated Circuits Georges Gielen, Willy M.C.

Sansen, 2012-12-06 It is a great honor to provide a few words of introduction for Dr Georges Gielen and Prof Willy Sansen's book Symbolic analysis for automated design of analog integrated circuits The symbolic analysis method presented in this book represents a significant step forward in the area of analog circuit design As demonstrated in this book symbolic analysis opens up new possibilities for the development of computer aided design CAD tools that can analyze an analog circuit topology and automatically size the components for a given set of specifications Symbolic analysis even has the potential to improve the training of young analog circuit designers and to guide more experienced designers through second order phenomena such as distortion This book can also serve as an excellent reference for researchers in the analog circuit design area and creators of CAD tools as it provides a comprehensive overview and comparison of various approaches for analog circuit design automation and an extensive bibliography The world is essentially analog in nature hence most electronic systems involve both analog and digital circuitry As the number of transistors that can be integrated on a single integrated circuit IC substrate steadily increases over time an ever increasing number of systems will be implemented with one or a few very complex ICs because of their lower production costs
