This book contains papers presented at the International Symposium on Elect magnetic Fields in Mechatronics Electrical and Electronic Engineering ISEF 07 which was held in Prague the Czech Republic from September 13 to 15 2007 ISEF conferences have been organized since 1985 and from the very beginning it was a common initiative of Polish and other European researchers who have dealt with electromagnetic eld in electrical engineering The conference travels through Europe and is organized in various academic centres Relatively often it was held in some Polish city as the initiative was on the part of Polish scientists Now ISEF is much more international and successive events take place in different European academic centres renowned for electromagnetic research This time it was Prague famous for its beauty and historical background as it is the place where many c tures mingle The venue of the conference was the historical building of Charles University placed just in the centre of Prague The Technical University of Prague in turn constituted the logistic centre of the conference It is the tradition of the ISEF meetings that they try to tackle quite a vast area of computational and applied electromagnetics Moreover the ISEF symposia aim at combining theory and practice therefore the majority of papers are deeply rooted in engineering problems being simultaneously of a high theoretical level
