*5th International Symposium on Data Mining Applications* Mamdouh Alenezi, Basit Qureshi, 2018-03-28 The 5th Symposium on Data Mining Applications SDMA 2018 provides valuable opportunities for technical collaboration among data mining and machine learning researchers in Saudi Arabia Gulf Cooperation Council GCC countries and the Middle East region This book gathers the proceedings of the SDMA 2018 All papers were peer reviewed based on a strict policy concerning the originality significance to the area scientific vigor and quality of the contribution and address the following research areas Applications Applications of data mining in domains including databases social networks web bioinformatics finance healthcare and security Algorithms Data mining and machine learning foundations algorithms models and theory Text Mining Semantic analysis and mining text in Arabic semi structured streaming multimedia data Framework Data mining frameworks platforms and systems implementation Visualizations Data visualization and modeling Bluetooth 5.0 Modem Design for IoT Devices Khaled Salah Mohamed, 2021-11-13 This book provides an introduction to Bluetooth technology with a specific focus on developing a hardware architecture for its modem The major concepts and techniques involved in Bluetooth technology are discussed with special emphasis on hardware mapping The book starts simply to allow the reader to master quickly the basic concepts before addressing the advanced features This book differs from existing content in that it presents Bluetooth Transceiver architecture suitable for implementation in an FPGA for IoT Devices It will examine several digital algorithms for modulation and demodulation of Bluetooth signals locking on the carrier phase and synchronizing the symbol Many of these previously analog designs have been translated to the digital domain Simulation and Modeling Methodologies, Technologies and Applications Mohammad S. Obaidat, Tuncer Ören, Floriano De Rango, 2018-11-20 This book highlights a set of selected revised and extended papers from the 7th International Conference on Simulation and Modeling Methodologies Technologies and Applications SIMULTECH 2017 held in Madrid Spain on July 26 to 28 2017 The conference brought together researchers engineers and practitioners whose work involves methodologies in and applications of modeling and simulation The papers showcased here represent the very best papers from the Conference and report on a broad range of new and innovative solutions Machine Learning and Cognitive Computing for Mobile Communications and Wireless Networks Krishna Kant Singh, Akansha Singh, Korhan Cengiz, Dac-Nhuong Le, 2020-07-08 Communication and network technology has witnessed recent rapid development and numerous information services and applications have been developed globally These technologies have high impact on society and the way people are leading their lives The advancement in technology has undoubtedly improved the quality of service and user experience yet a lot needs to be still done Some areas that still need improvement include seamless wide area coverage high capacity hot spots low power massive connections low latency and high reliability and so on Thus it is highly desirable to develop smart technologies for communication to improve the overall services and management of wireless communication Machine learning and cognitive

computing have converged to give some groundbreaking solutions for smart machines. With these two technologies coming together, the machines can acquire the ability to reason similar to the human brain. The research area of machine learning and cognitive computing covers many fields like psychology, biology, signal processing, physics, information theory, mathematics, and statistics that can be used effectively for topology management. Therefore, the utilization of machine learning techniques like data analytics and cognitive power will lead to better performance of communication and wireless systems. ***Security and Privacy Applications for Smart City Development*** Sharvari Chandrashekhara Tamane, Nilanjan Dey, Aboul-Ella Hassanien, 2020-10-01. This book explores the fundamentals of smart cities along with issues, controversies, problems, and applications concerning security and privacy in smart city development. Future smart cities must incorporate innovations like smart rainwater harvesting, smart street lighting, digital identity management, solar energy, intelligent transport systems, and emerging communication applications. The target audience of the book includes professionals, researchers, academics, advanced level students, technology developers, doctors, and biologists working in the field of smart city applications. Professionals will find innovative ideas for marketing and research, while developers can use various technologies like IoT and block chain to develop the applications discussed here. As the book shows, by integrating new technologies, the cities of the future are becoming a reality today. ***Demand Response Application in Smart Grids*** Sayyad Nojavan, Kazem Zare, 2019-12-05. This book analyzes issues surrounding the efficient integration of demand response programs (DRPs) on operation problems in smart grids. The benefits offered by demand response programs (DRPs) for load serving entities, grid operators, and electricity consumers are explained, including decreased electricity prices and risk management. In depth chapters discuss the flexibility of market operations, market power mitigation, and environmental benefits, making this a must-have reference for engineers and related practicing professionals working for organizations in the electricity market, including reliability organizations, distribution companies, transmission companies, and electric end users. ***Computer Communication, Networking and Internet Security*** Suresh Chandra Satapathy, Vikrant Bhateja, K. Srujan Raju, B. Janakiramaiah, 2017-05-02. The book is a compilation of high quality scientific papers presented at the 3rd International Conference on Computer Communication Technologies (IC3T 2016). The individual papers address cutting edge technologies and applications of soft computing, artificial intelligence, and communication. In addition, a variety of further topics are discussed which include data mining, machine intelligence, fuzzy computing, sensor networks, signal and image processing, human computer interaction, web intelligence, etc. As such, it offers readers a valuable and unique resource. ***Artificial Intelligence Applications and Innovations*** Ilias Maglogiannis, John Macintyre, Lazaros Iliadis, 2021-06-22. This book constitutes the refereed proceedings of the 17th IFIP WG 12.5 International Conference on Artificial Intelligence Applications and Innovations (AIAI 2021) held virtually and in Hersonissos, Crete, Greece, in June 2021. **Safety Message Broadcast in Vehicular Networks** Yuanguo Bi, Haibo Zhou, Weihua Zhuang, Hai Zhao, 2016-12-16 This book presents the current research on safety message dissemination in vehicular networks covering medium access control and relay selection for multi hop safety message broadcast. Along with an overall overview of the architecture characteristics and applications of vehicular networks the authors discuss the challenging issues in the research on performance improvement for safety applications and provide a comprehensive review of the research literature. A cross layer broadcast protocol is included to support efficient safety message broadcast by jointly considering geographical location physical layer channel condition and moving velocity of vehicles in the highway scenario. To further support multi hop safety message broadcast in a complex road layout the authors propose an urban multi hop broadcast protocol that utilizes a novel forwarding node selection scheme. Additionally a busy tone based medium access control scheme is designed to provide strict priority to safety applications in vehicle to infrastructure communications. This book offers useful insights into protocol design and inspires a new line of thinking in performance improvements for safety applications in vehicular networks. It is a valuable resource for professionals researchers or advanced level students working in vehicular networks or quality of service.
