**Mathematics Education** Benjamin Rott, Günter Törner, Joyce Peters-Dasdemir, Anne Möller, Safrudiannur, 2018-12-14 The book is made up of 21 chapters from 25 presentations at the 23rd MAVI conference in Essen which featured Alan Schoenfeld as keynote speaker. Of major interest to MAVI participants is the relationship between teachers' professed beliefs and classroom practice. The first section is dedicated to classroom practices and beliefs regarding those practices, taking a look at prospective or practicing teachers' views of different practices such as decision making, the roles of explanations, problem solving, patterning, and the use of play. The focus of the second section in this book deals with teacher change, which is notoriously difficult even when the teachers themselves are interested in changing their practice. The third section of this book centers on the undercurrents of teaching and learning mathematics, what arises in various situations causing tensions and inconsistencies. The last section of this book takes a look at emerging themes in affect-related research. In this section, papers discuss attitudes towards assessment. *Resources in Education*, 1997 **Changing Education**, 1994 *The*

*Three Waves of Reform in the World of Education 1918 - 2018* Ami Volansky, 2023-01-01 This book reviews one hundred years of educational reforms worldwide. Characterized by a tension between governing public and professional forces, the waves of educational reform reflect myriad efforts to define and fulfill professional and public expectations for the world of education. The first wave of reform, based on progressive ideals, spread across the globe after World War I, striving to place the student at the center of the education process and respond to the diverse needs of children and youth in a world that included massive population shifts. The second wave nearly obliterated the ideals of the progressive movement that had prevailed for sixty years. Drawing its principles from the business world, the second wave imposed competition, uniform standards, and measurable outputs on students, teachers, and schools, even at the cost of harming at-risk populations and encouraging the infiltration of private sector values into public education systems. The third wave was launched at the turn of the twenty-first century. Seeking to adjust instructional methods to modern reality, this reform rejected standardized curricula in favor of developing skills such as independent thinking, curiosity, innovation, collaboration among learners, and the ability to mine and process information. Book I reviews the three waves of reform in the United States, England, Canada, Japan, Singapore, Hong Kong, Australia, and Finland. Book II focuses on Israel's education system, past, present, and future. Getting
