Introductory and Intermediate Algebra, Global Edition Marvin L. Bittinger, Judith A. Beecher, Barbara L.

Johnson, 2015-04-28 The Bittinger Worktext Series recognizes that math hasn't changed but students and the way they learn math have. This latest edition continues the Bittinger tradition of objective-based guided learning while also integrating timely updates to the proven pedagogy. This edition has a greater emphasis on guided learning and helping students get the most out of all of the resources available including new mobile learning resources whether in a traditional lecture hybrid lab-based or online course. MyMathLab not included. Students if MyMathLab is a recommended mandatory component of the course please ask your instructor for the correct ISBN and course ID. MyMathLab should only be purchased when required by an instructor. Instructors contact your Pearson representative for more information. MyMathLab is an online homework tutorial and assessment product designed to personalize learning and improve results. With a wide range of interactive

The new edition offers new resources like the Student Organizer and now includes Student Resources in the back of the book to help students on their quest for success. **Beginning and Intermediate Algebra with Applications & Visualization** Gary K. Rockswold, Terry A. Krieger, 2013-10-03 The Rockswold-Krieger algebra series fosters conceptual understanding by using relevant applications and visualization to show students why math matters. It answers the common question: When will I ever

use this Rockswold teaches students the math in context rather than including the applications at the end of the presentation By seamlessly integrating meaningful applications that include real data and supporting visuals graphs tables charts colors and diagrams students are able to see how math impacts their lives as they learn the concepts The authors believe this approach deepens conceptual understanding and better prepares students for future math courses and life
