Charles Darwin and the Church of Wordsworth Robert M. Ryan, 2016

Charles Darwin and the Church of William Wordsworth is a study of the cultural connections between two of the nineteenth century's most influential figures Charles Darwin and William Wordsworth When Darwin published *On the Origin of Species* his reading public's affective response to the natural world had already been profoundly influenced by William Wordsworth Wordsworth presented nature as benign harmonious a source of moral inspiration and spiritual blessing and a medium through which one might enter into communion with the Divine Long after his death he continued to be revered throughout the English speaking world not only as a great poet but as a theologian with a broader following than any prelate and an appeal that transcended or ignored sectarian differences For believers and skeptics alike Wordsworth's poetry offered a readily accessible and intellectually respectable counterweight to Darwin's vision of a material universe evolving by fixed laws in which Divinity played no discernible role and where concepts like beauty and harmony were material conditions to be explained in scientific terms Wordsworth's theology of nature became for many readers a more effective counterforce to Darwin's ideas than Biblical orthodoxy but it also provided an enriching context for the reception of evolutionary theory aiding theists in their effort to reach an accommodation with the new science As the nineteenth century's two most prominent theoreticians of nature's life Wordsworth and Darwin competed for attention among those seeking to understand humanity's relationship with the natural world and their disciples engaged in a productive mutually transformative dialogue in which the poet's cultural authority influenced the way Darwin was received and Darwinian science adjusted interpretation and evaluation of the poetry Charles Darwin and the Church of William Wordsworth explores the broad cultural relationship between Wordsworth Darwin and their disciples contextualizing them within wider discussions about the relationship between religion and science in the nineteenth century
