Austin, 1999-06-04 A neuroscientist and Zen practitioner interweaves the latest research on the brain with his personal narrative of Zen Aldous Huxley called humankind's basic trend toward spiritual growth the perennial philosophy In the view of James Austin the trend implies a perennial psychophysiology because awakening or enlightenment occurs only when the human brain undergoes substantial changes What are the peak experiences of enlightenment How could these states profoundly enhance and yet simplify the workings of the brain Zen and the Brain presents the latest evidence In this book Zen Buddhism becomes the opening wedge for an extraordinarily wide ranging exploration of consciousness In order to understand which brain mechanisms produce Zen states one needs some understanding of the anatomy physiology and chemistry of the brain Austin both a neurologist and a Zen practitioner interweaves the most recent brain research with the personal narrative of his Zen experiences The science is both inclusive and rigorous the Zen sections are clear and evocative Along the way Austin examines such topics as similar states in other disciplines and religions sleep and dreams mental illness consciousness altering drugs and the social consequences of the advanced stage of ongoing enlightenment Principles of Anatomy and Physiology Gerard J. Tortora, Bryan Derrickson, 2006 This highly acclaimed widely used book has provides a superb balance between structure and function emphasizing the correlations between normal physiology and pathophysiology normal anatomy and pathology and homeostasis and homeostatic imbalances **Catalog of Copyright Entries. Third Series** Library of Congress. Copyright Office, 1971 Resources in Education , 1984 Subject Guide to Books in Print , 1991 The Gender of Debt Mariano Pavanello, 2019-03-27 This book demonstrates from a historical and an economic point of view how the female contribution has been so determinant in the success of our species and how it is linked to male dominance Male hunting and female gathering were the two forces of production during 99% of the life of mankind on Earth Ethnographic evidence shows that female gathering is more productive and less time consuming than male hunting Therefore the prehistoric communities of Homo sapiens could manage their social labor time in the most productive way only if women lent their time to men through the supply of basic energy a debt that men incurred since the dawn of history but never acknowledged It is time now to give the gender economic relations the crucial place they deserve in a theory of human cooperation and sociality without forgetting that it is necessarily a theory of social inequality The Lancet London , 1873 The Publishers' Trade List Annual , 1970
