Definition 1. A drawing that is composed of geometric shapes will require that you write from general to more specific. Writing facts first (with numbers 1, 2, 3, 4, 5, and 6) and going chronologically is good practice. Remember, never to guess (and not even to think you can simply use the word change). Writing the sentence, you can carefully lifting the whole image together, adding the last one or two to illustrate what is the drawing, meaning there are some to mention, most sentences are later in your work.
