Ancient History Common Core Tasks:

Critical Ancient World Studies Mathura Umachandran, Marchella Ward, 2023-12-27 This volume explores and elucidates critical ancient world studies CAWS a new model for the study of the ancient world operating critically setting itself against a long history of a discipline formulated to naturalise a hierarchical white supremacist origin story for an imagined modern West CAWS is a methodology for the study of antiquity that shifts away from the assumptions and approaches of the discipline known as classical studies and or classics Although it seeks to reckon with the discipline's colonial history it is not simply the application of decolonial theory or the search to uncover subaltern narratives in a subject that has special relevance to the privileged and powerful Rather it dismantles the structures of knowledge that have led to this privileging and questions the categories ideas themes narratives and epistemological structures that have been deemed objective and essential within the inherited discipline of classics The contributions in this book by an international group of researchers offer a variety of situated embodied perspectives on the question of how to imagine a more critical discipline rather than a unified single view The volume is divided into four parts Critical Epistemologies Critical Philologies Critical Time and Critical Space and Critical Approaches and uses these as spaces to propose disciplinary transformation Critical Ancient World Studies The Case for Forgetting Classics is a must read for scholars and practitioners teaching in the field of classical studies and the breadth of examples also makes it an invaluable resource for anyone working on the ancient world or on confronting Eurocentrism within other disciplines The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution CC BY 4.0 license

The Western Time of Ancient History Alexandra Lianeri, 2011-03-31 This book examines the conceptual and temporal frames through which modern Western historiography has linked itself to classical antiquity In doing so it articulates a genealogical problematic of what history is and a more strictly focused reappraisal of Greek and Roman historical thought Ancient ideas of history have played a key role in modern debates about history writing from Kant through Hegel to Nietzsche and Heidegger and from Friedrich Creuzer through George Grote and Theodor Mommsen to Momigliano and Moses Finley yet scholarship has paid little attention to the theoretical implications of the reception of these ideas The essays in this collection cover a wide range of relevant topics and approaches and boast distinguished authors from across Europe in the fields of classics ancient and modern history and the theory of historiography

The Oxford Handbook of Early Modern European History, 1350-1750 Hamish M. Scott, 2015 This Handbook re-examines the concept of early modern history in a European and global context The term early modern has been familiar especially in Anglophone scholarship for four decades and is securely established in teaching research and scholarly publishing More recently however the unity implied in the notion has fragmented while the usefulness and even the validity of the term and the historical periodisation which it incorporates have been questioned The Oxford Handbook of Early Modern European History 1350-1750 provides an account of the

development of the subject during the past half century but primarily offers an integrated and comprehensive survey of present knowledge together with some suggestions as to how the field is developing It aims both to interrogate the notion of early modernity itself and to survey early modern Europe as an established field of study The overriding aim will be to establish that early modern is not simply a chronological label but possesses a substantive integrity Volume I examines Peoples and Place assessing structural factors such as climate printing and the revolution in information social and economic developments and religion including chapters on Orthodoxy Judaism and Islam
