Field and Laboratory Exercises in Animal Behavior Chadwick V. Tillberg, Michael D. Breed, Sarah J. Hinnners, 2007-09-04
Field and Laboratory Exercises in Animal Behavior is an interactive laboratory manual for students in animal behavior ethology and behavioral ecology. It is the first of its kind in this subject area that guides students through the diverse and fascinating fields of behavioral and ethological studies employing a wide array of organisms as model systems for the study of behavior. Students participate in the development of hypothesis and turn the recording, analysis, and interpretation of data into an active and engaging process. A teacher-friendly companion website provides extensive teaching notes on the background to each lab project, tips and hints for successful project presentation, sources for studying organisms, ideas for variations in labs, and alternate study organisms. This text is recommended for undergraduate courses in Animal Behavior, Ethology, and Behavioral Ecology. Provides fully developed and tested laboratory exercises. Offers both field and lab experiences adaptable for fall, spring, or summer courses. Laboratories emphasize student thought and involvement in experimental design. Includes an online supplement to the manual for teachers. *Exploring Animal Behavior in Laboratory and Field* Heather Zimble-DeLorenzo, Susan W. Margulis, 2021-07-19
Exploring Animal Behavior in Laboratory and Field Second Edition provides a comprehensive manual on animal behavior lab activities. This new edition brings together basic research and methods, presenting applications and problem-solving techniques. It provides all the details to successfully run designed activities while also offering flexibility and ease in setup. Each lab provides details on how to successfully run the activity while also offering flexibility to instructors. This is an important resource for students, educators, researchers, and practitioners who want to explore and study animal behavior. The field of animal behavior has changed dramatically in the past 15-20 years, including a greater use and availability of technology and statistical analysis. In addition, animal behavior has taken on a more applied role in the last decade with a greater emphasis on conservation and applied behavior, hence the necessity for new resources on the topic.
