1. A girl sitting on a merry-go-round moves counterclockwise through an arc length of 2.50 m. If the girl's angular displacement is 1.67 rad, how far is she from the center of the merry-go-round?
2. A beetle sits at the top of a bicycle wheel and flies away just before it would be squashed. Assuming that the wheel turns clockwise, the beetle's angular displacement is π rad, which corresponds to an arc length of 1.2 m. What is the wheel's radius?
3. A car on a Ferris wheel has an angular displacement of $\frac{\pi}{4}$ rad, which corresponds to an arc length of 29.8 m. What is the Ferris wheel's radius?
4. Fill in the unknown quantities in the following table:

	$\Delta\theta$	Δs	r
a.	? rad	+0.25 m	0.10 m
b.	+0.75 rad	?	8.5 m
c.	? degrees	-4.2 m	0.75 m
d.	+135°	+2.6 m	?

Fundamentals of Biomechanics Duane Knudson, 2007-05-28 Fundamentals of Biomechanics 2nd edition presents a clear conceptual approach to understanding biomechanics within the context of the qualitative analysis of human movement. The philosophy is to blend up to date biomechanical knowledge with extensive referencing for student study with professional application knowledge. This true application of biomechanics in real world settings is missing in previous biomechanics texts. The text provides real world examples of the application of biomechanics several ways. Like other texts, human movement examples and problems are discussed to help teach biomechanical variables and concepts. This text however goes beyond this physics class with sport example approach. First nine principles of biomechanics are developed throughout the book to link theoretical knowledge with practical professional principles and application. These nine generic application principles are based on the laws and concepts of biomechanics so they can be applied to all human movements. These principles help PETE majors address standard 2 on applying movement concepts and principles in physical education. NASPE 1995. Most biomechanics texts that have tried to develop principles for application have created many specific observations about many categories of human movement so students tend to get lost. Second, the last section of the book develops the application of biomechanics in qualitative analysis of several movements in four professional areas: physical education, coaching, strength conditioning, and sports medicine. These guided tours of the application of biomechanics to solve human movement problems are similar to the extensive interdisciplinary qualitative analysis tutorials in Knudson Morrison 2002.

Excerpt: apparel and sought and obtained employment as a teamster in the quartermasters department. Her features were very large and so coarse and masculine was her general appearance that she would readily have passed as a man and in her case the deception was no doubt easily practiced. Next day she was caught and proved to be a rather prepossessing young woman and though necessarily bronzed and hardened by exposure I doubt if even with these marks of campaigning she could have deceived as readily as did her companion. How the two got acquainted I

never learned and though they had joined the army independently of each other yet an intimacy had sprung up between them long before the mishaps of the foraging expedition They both were forwarded to army headquarters and when provided with clothing suited to their sex sent back to Nashville and thence beyond our lines to Louisville On January 9 by an order from the War Department the Army of the Cumberland had been divided into three corps designated the Fourteenth Twentieth and Twenty first This order did not alter the composition of the former grand divisions nor change the commanders but the new nomenclature was a decided improvement over the clumsy designations Right Wing Centre and Left Wing which were well calculated to lead to confusion sometimes McCooks wing became the Twentieth Corps and my division continued of the same organization and held the same number as formerly the Third Division Twentieth Corps My first brigade was now commanded by Brigadier General William H Lytle the second by Colonel Bernard Laiboldt and the third by Colonel Luther P Bradley On the 4th of March I was directed to move in light marching order toward Franklin and Mechanics ,
