Anti Ugly Excursions In English Architecture And Design Gavin Stamp:

Anti-Ugly Gavin Stamp,2013-12-01 Since 2004 Gavin Stamp one of Britain s most eminent and readable architectural historians has written a monthly column for Apollo the esteemed architecture and fine art magazine The subject is simply whatever in design or architecture happens to take his fancy It might be the splendid reopening of the magnificent Midland Grand Hotel at St Pancras Station or the dilapidation of a little known church in Eastbourne the much lamented demise of the original Routemaster bus or the colossal majesty of the airship sheds that housed the R 101

100 20th-Century Buildings Twentieth Century Society,2024-06-06 A stylish celebration of some of the greatest buildings in Britain from the 20th century and beyond by the country s leading organisation for the protection of 20th century architecture This fascinating book showcases 100 standout buildings from 1914 onwards representing the broad variety of 20th century British architecture The structures celebrated in this book include the Royal Festival Hall the Hepworth Gallery Preston Bus Station Battersea Power Station the Barbican Estate the Aquatics Centre and many more The glorious photography in 100 20th Century Buildings is accompanied by insightful text from a range of expert architectural writers and enthusiasts including Alan Powers Owen Hatherley and Rowan Moore along with several longer essays on different aspects of the 20th century built environment the late Gavin Stamp on the inter war decades the much missed Elaine Harwood on post war architecture and Timothy Brittain Catlin on postmodernism From factories to art galleries churches to health centres office blocks to individual private dwellings this book provides a captivating overview of the 20th century built environment

The City in the City Amy Thomas,2023-12-26 An exploration of the dramatic transformation of London s financial district after 1945 viewed at four spatial scales city street facade interior In *The City in the City* Amy Thomas offers the first in depth architectural and urban history of London s financial district the City of London from the period of rebuilding after World War II to the explosive climax of financial deregulation in the 1980s and its long aftermath Thomas examines abstract financial ideas political ideology and invisible markets as concrete realities working on four spatial scales city street facade and interior the book explores the grand plans hidden alleys neo Georgian elevations and sweaty dealing floors that have made the financial center work Moving from politics to sociology institutions to bodies development plans to office desks Thomas unravels the rich entanglements between the structure of the UK s financial system and the structure of the environment in which it operates Despite its physical and political centrality this period of the City s architectural history occupies an academic lacuna Longstanding prejudices about developer led architecture and the real estate industry have obscured the postwar City s relevance The book shows how as currents of local government reform nation building and globalization swept across Britain the City became an ideological battleground for debates between

politicians and financial institutions real estate developers and architects preservationists and so called proactive planners throughout the latter half of the century The City of London is a place steeped in rich cultural and architectural heritage of immense national significance yet it is also a highly privileged citadel at the core of global financial networks The City in the City is both a critique and a celebration of this unique and complex place

Ugliness Gretchen E. Henderson, 2015-11-15

Ugly as sin the ugly duckling or maybe you fell out of the ugly tree Let's face it we've all used the word ugly to describe someone we've seen hopefully just in our private thoughts but have we ever considered how slippery the term can be indicating anything from the slightly unsightly to the downright revolting What really lurks behind this most favored insult In this actually beautiful book Gretchen E Henderson casts an unfazed gaze at ugliness tracing its long standing grasp on our cultural imagination and highlighting all the peculiar ways it has attracted us to its repulsion Henderson explores the ways we have perceived ugliness throughout history from ancient Roman feasts to medieval grotesque gargoyles from Mary Shelley's Frankenstein to the Nazi Exhibition of Degenerate Art Covering literature art music and even the cutest possible incarnation of the term Uglydolls she reveals how ugliness has long posed a challenge to aesthetics and taste She moves beyond the traditional philosophic argument that simply places ugliness in opposition to beauty in order to dismantle just what we mean when we say ugly Following ugly things wherever they have trod she traverses continents and centuries to delineate the changing map of ugliness and the profound effects it has had on the public imagination littering her path with one fascinating tidbit after another Lovingly illustrated with the foulest images from art history and culture Ugliness offers an oddly refreshing perspective going past the surface to ask what ugly truly is even as its meaning continues to shift

Making Dystopia James Stevens Curl, 2018-08-23 In Making Dystopia distinguished architectural historian James Stevens Curl tells the story of the advent of architectural Modernism in the aftermath of the First World War its protagonists and its astonishing almost global acceptance after 1945 He argues forcefully that the triumph of architectural Modernism in the second half of the twentieth century led to massive destruction the creation of alien urban landscapes and a huge waste of resources Moreover the coming of Modernism was not an inevitable seamless evolution as many have insisted but a massive unparalleled disruption that demanded a clean slate and the elimination of all ornament decoration and choice Tracing the effects of the Modernist revolution in architecture to the present Stevens Curl argues that with each passing year so called iconic architecture by supposed star architects has become more and more bizarre unsettling and expensive ignoring established contexts and proving to be stratospherically remote from the aspirations and needs of humanity In the elite world of contemporary architecture form increasingly follows finance and in a society in which the haves have more and more and the have nots are ever more marginalized he warns that contemporary architecture continues to stack up huge potential problems for the future as housing costs spiral out of control resources are squandered on architectural bling and society fractures This courageous passionate deeply researched and profoundly argued book should be read by everyone concerned

with what is around us Its combative critique of the entire Modernist architectural project and its apologists will be highly controversial to many But it contains salutary warnings that we ignore at our peril And it asks awkward questions to which answers are long overdue

No more giants Jessica Kelly,2023-01-24 Architecture is more than buildings and architects It also involves photographers writers advertisers and broadcasters as well as the people who finance and live in the buildings Using the career of the critic J M Richards as a lens this book takes a new perspective on modern architecture Richards served as editor of *The Architectural Review* from 1937 to 1971 during which time he consistently argued that modernism was integrally linked to vernacular architecture not through style but through the principle of being an anonymous expression of a time and public spirit Exploring the continuities in Richards s ideas throughout his career disrupts the existing canon of architectural history which has focused on abrupt changes linked to individual pioneers encouraging us to think again about who is studied in architectural history and how they are researched

Peace and Power in Cold War Britain Christopher R. Hill,2020-02-20 *Peace and Power in Cold War Britain* explores the ban the bomb and anti Vietnam War movements from the perspective of media history focusing in particular on the relationship between radicalism and the rise of television In doing so it addresses two questions both of which seem to recur with each major breakthrough in communications technology what do advances in communications media mean for democratic participation in politics and how do distinctive types of media condition the very nature of that participation itself In answering these the book views the ban the bomb and anti Vietnam War movements in relation to communication power and media discourse It highlights how these movements intersected with parts of public life that were being transformed by television themselves shaping struggles for social change among activists and public intellectuals on the streets in the Labour Party and in the law courts The significance of this relationship between media and movements was complex and wide ranging Christopher R Hill demonstrates that it contributed to the enrichment of democracy in Cold War Britain with radicals serving to innovate and pioneer creative forms of political expression from both in and outside of media organisations However the movements increasingly succumbed to news coverage and values that revolved around human interest and violence feeding into the revolutionary spectacle of 1968 and the turn towards identity politics

Sex, Spies and Scandal Alex Grant,2024-01-23 In September 1962 John Vassall a clerk at the Admiralty in London was unmasked as a Soviet spy After being photographed in compromising positions while working at the British embassy in Moscow Vassall was blackmailed into handing British defence secrets over to his Soviet handlers for seven years While there have been several successful books and film adaptations about the Profumo Jeremy Thorpe and Duchess of Argyll affairs the story of John Vassall who was responsible for a more serious intelligence breach is ripe for retelling It has everything a honey trap industrial scale espionage journalists jailed for not revealing their sources and the first modern tabloid witch hunt which resulted in a ministerial resignation and almost brought down Harold Macmillan s government With access to newly released MI5 files and interviews with people

who knew Vassall from the 1950s until his death in 1996 this book sheds new light on a neglected spy scandal Despite having been drugged and sexually assaulted by the KGB in Moscow as a gay man John Vassall was shown no mercy by the British press or the courts Sentenced to eighteen years in jail he served ten years despite telling MI5 everything Once released he found that many of his old friends and lovers had been persecuted or dismissed from the civil service in Britain America and Australia Unlike the Cambridge Five who courted attention after leaving prison Vassall changed his name to avoid the media and lived quietly in London Including atmospheric detail about Dolphin Square a hotbed of political intrigue but also a safe haven for members of the LGBT community in the 1950s and 60s this is an explosive tale of sexual violence betrayal conspiracy snobbery homophobia and hypocrisy that blows apart some of the British establishment s darkest secrets *The Everyday Life of Memorials* Andrew M. Shanken, 2022-10-04 A timely study erudite and exciting about the ordinary and oftentimes unseen lives of memorials Memorials are commonly studied as part of the commemorative infrastructure of modern society Just as often they are understood as sites of political contestation where people battle over the meaning of events But most of the time they are neither Instead they take their rest as ordinary objects part of the street furniture of urban life Most memorials are turned on only on special days such as Memorial Day or at heated moments as in August 2017 when the Robert E Lee monument in Charlottesville was overtaken by a political maelstrom The rest of the time they are turned off This book is about the everyday life of memorials It explores their relationship to the pulses of daily life their meaning within this quotidian context and their place within the development of modern cities Through Andrew Shanken s close historical readings of memorials both well known and obscure two distinct strands of scholarship are thus brought together the study of the everyday and memory studies From the introduction of modern memorials in the wake of the French Revolution through the recent destruction of Confederate monuments memorials have oscillated between the everyday and the not everyday In fact memorials have been implicated in the very structure of these categories *The Everyday Life of Memorials* explores how memorials end up where they are grow invisible fight with traffic get moved are assembled into memorial zones and are drawn anew into commemorations and political maelstroms that their original sponsors never could have imagined Finally exploring how people behave at memorials and what memorials ask of people reveals just how strange the commemorative infrastructure of modernity is
