Ao Smith Cross Reference Guide:

The Tight Junction and Its Proteins: More Than Just a Barrier Michael Fromm, Susanne M. Krug, 2020-11-20 For a long time the tight junction TJ was known to form and regulate the paracellular barrier between epithelia and endothelial cell sheets Starting shortly after the discovery of the proteins forming the TJ mainly the two families of claudins and TAMPs several other functions have been discovered a striking one being the surprising finding that some claudins form paracellular channels for small ions and or water This Special Issue includes 43 articles covering numerous dedicated topics including pathogens affecting the TJ barrier TJ regulation via immune cells the TJ as a therapeutic target TJ and cell polarity function and regulation by proteins of the tricellular TJ TJ as a regulator of cellular processes organ and tissue specific functions TJ as sensors and reacting to environmental conditions and last but not least TJ proteins and cancer

Marketing Information Guide, 1969 **Cumulated Index Medicus**, 2000 **Industrial Distribution**, 1983 Lassa Fever Hinh Ly, 2020-12-29

Lassa virus causes Lassa fever disease in several countries in West Africa where it is estimated to infect up to half million people causing roughly five thousand deaths each year This deadly virus has also been introduced in multiple occasions into the western world including the United States United Kingdom Netherlands Sweden and Germany Lassa virus infection which is often misdiagnosed can lead to a wide range of disease symptoms ranging from mild flu like symptoms to bleeding disorders multi organ failure and death Despite some major discoveries made in recent years of research on Lassa fever there are still many unresolved key issues that hamper the development of effective vaccines and therapies Some of these issues include a detailed understanding of the viral and participating host factors in completing the virus life cycle in mediating disease pathogenesis or protection and in activating or suppressing host immune responses against virus infection This book is devoted to understanding some of these important issues Expert and timely contributions in the form of editorial and original research and review articles on Lassa fever viral replication disease pathogenesis and protection host immune modulations and other related hot topics are presented in this publication Bioinorganic Chemistry of Nickel Michael J. Maroney, Stefano Ciurli, 2020-06-16 The chemistry of nickel in biological systems has been intensely investigated since the discovery of the essential role played by this transition metal in the enzyme urease ca 1975 Since then several nickel dependent enzymes have been discovered and characterized at the molecular level using structural spectroscopic and kinetic methods and insight into reaction mechanisms has been elaborated using synthetic and computational models The dual role of nickel as both an essential nutrient and as a toxin has prompted efforts to understand the molecular mechanisms of nickel toxicology and to uncover the means by which cells select nickel from among a pool of different and more readily available metal ions and thus regulate the intracellular chemistry of nickel This latter effort highlights the importance of proteins involved in the extra and intra cellular sensing of nickel the roles of nickel selective proteins for import and export and nickel responsive transcription factors all of which are important for regulating nickel homeostasis In this Special Issue the

contributing authors have covered recent advances in many of these aspects of nickel biochemistry including toxicology bacterial pathogenesis carcinogenesis computational and synthetic models nickel trafficking proteins and enzymology

Neisseria gonorrhoeae Infections María-Teresa Pérez-Gracia, Beatriz Suay-García, 2021-05-11 Gonorrhea is a sexually transmitted infection caused by the obligate human pathogen *Neisseria gonorrhoeae*. This Gram negative diplococcus is highly infective due to its virulence factors pili Por proteins Opa proteins Rmp proteins lipooligosaccharides and IgA protease. Despite existing guidelines for its treatment the incidence of the disease follows an increasing trend worldwide. This is mainly due to the appearance of antibiotic resistant strains inefficient diagnostic methods and poor sexual education. Without an effective vaccine available the key priorities for the control of the disease include sexual education contact notification epidemiological surveillance diagnosis and effective antibiotic treatment. This Special Issue focuses on some of these important issues such as the molecular mechanisms of the disease diagnostic tests and different treatment strategies used to combat gonorrhea.

Duality Symmetry Ivan Fernandez-Corbaton, 2020-12-10 Symmetry is one of the most general concepts in physics. Symmetry arguments are used to explain and predict observations at all length scales from elementary particles to cosmology. The generality of symmetry arguments combined with their simplicity makes them a powerful tool for both fundamental and applied investigations. In electrodynamics one of the symmetries is the invariance of the equations under exchange of electric and magnetic quantities. The continuous version of this symmetry is most commonly known as electromagnetic duality symmetry. This concept has been accepted for more than a century and throughout this time has influenced other areas of physics like high energy physics and gravitation. This Special Issue is devoted to electromagnetic duality symmetry and other varieties of dualities in physics. It contains four Articles one Review and one Perspective. The context of the contributions ranges from string theory to applied nanophotonics which as anticipated shows that duality symmetries in general and electromagnetic duality symmetry in particular are useful in a wide variety of physics fields both theoretical and applied. Moreover a number of the contributions show how the use of symmetry arguments and the quantification of symmetry breaking can successfully guide our theoretical understanding and provide us with guidelines for system design.

Ward's Automotive Yearbook, 1963 Includes advertising matter. *Phytic Acid and Mineral Biofortification Strategies* Eleonora Cominelli, Francesca Sparvoli, Roberto Pilu, 2020-12-15 Two billion people worldwide mainly in developing countries where diets are based on the consumption of staple crops suffer from mineral deficiencies particularly for iron and zinc. Mineral biofortification includes different strategies aimed to increase mineral concentration and to improve mineral availability from the diet mineral bioavailability in the edible parts of plants particularly the seeds. Phytic acid is a compound that strongly reduces mineral bioavailability as being highly negatively charged it strongly binds cations acting as a magnet. All the contributions in this book aim to describe new results review the literature and comment on some of the economic and sociological aspects concerning mineral biofortification research. A number of contributions are

related to the study of mineral transport seed accumulation and approaches to increase seed micronutrient concentration
The remaining ones are mainly focused on the study of low phytic acid mutants
