

2022-2023 AP Chemistry

Congratulations on making the decision to take AP Chemistry! This course will move at a fast pace and cover a substantial amount of material, starting with the first day of school. The primary goal of this course is to earn college credit by passing the AP Chemistry exam with a score of 4 or higher in May 2023 (most colleges will not give credit for a score of 1, 2, or 3).

So that we can spend more time on topics new to you in AP Chemistry, you are expected to be familiar answering questions and solving problems using the content covered in your first year chemistry course. The attached **review assignment** covers first-year chemistry topics that will not be taught in AP chemistry.

Copies of the periodic table and the metric prefixes you will be using in AP Chemistry are included in this assignment. Please note that this periodic table does not include element names. Charges of monatomic ions and key polyatomic ions that need to be memorized by the first test are also included. You are encouraged to make flashcards or use Quizlet ions to practice learning these ions.

If you have any questions during the summer, you are welcome to contact me via email at andrea.gjertsen@acsk-12.org. I wish each of you a restful and enjoyable summer, and I look forward to seeing you next school year!
