

EXAMPLE 3

Geometric Figure Application
 The graph shows the water level in a reservoir at different times. Find the slope of the line segment.

Step 1 Find the slope formula.

$$m = \frac{y_2 - y_1}{x_2 - x_1}$$

$$= \frac{1000 - 0}{20 - 0}$$

$$= \frac{1000}{20}$$

$$= 50$$

Step 2 Find the slope formula.

The reservoir is 1000 feet deep and it takes 20 hours to fill it. The water level rises 50 feet per hour. This means the water level in the reservoir is increasing at a rate of 50 feet per hour.

Check Your Understanding
 The graph shows the height of a plant over a period of time. Find the slope of the line. What does the slope represent?

To find the slope of the line, you can use the slope formula. The slope of the line is 1. This means the plant is growing at a rate of 1 inch per day.

EXAMPLE 4

Finding Slope from an Equation

Find the slope of the line described by $4x - 3y = 30$.

Step 1 Write the equation in slope-intercept form.

$$4x - 3y = 30$$

$$-3y = -4x + 30$$

$$y = \frac{4}{3}x - 10$$

Step 2 Find the y-intercept.

$$4x - 3y = 30$$

$$-3y = -4x + 30$$

$$y = \frac{4}{3}x - 10$$

Step 3 The line passes through $(0, -10)$ and $(7.5, 0)$. Use the slope formula.

$$m = \frac{y_2 - y_1}{x_2 - x_1} = \frac{0 - (-10)}{7.5 - 0} = \frac{10}{7.5} = \frac{4}{3}$$

Check Your Understanding
 Find the slope of the line described by $2x + 3y = 12$.

THINK AND DISCUSS

- The slope of a line is the difference of the y -coordinates divided by the difference of the x -coordinates. Are any two points on the line?
- Two points on a line define a unique line. If you know the slope of a line, can you find the equation of the line? (Yes/No) Why?
- GET ORGANIZED** Copy and complete the graphic organizer. In each box, show the line in that box using the given equation.

Graphing Lines

Line 1: $y = 2x + 3$
 Line 2: $y = -x + 4$
 Line 3: $y = 0.5x - 1$

GUIDED PRACTICE

Find the slope of the line that contains each pair of points.

- $(1, 3)$ and $(4, 7)$
- $(-2, 5)$ and $(3, 1)$
- $(-1, -2)$ and $(4, 3)$

Each graph below shows a linear relationship. Find the slope.

x	y
0	25
1	20
2	15
3	10

Find the slope of each line. Then tell what the slope represents.

Find the slope of the line described by each equation.

- $3x + 2y = 12$
- $5x = 100 - 2y$
- $3y = 100 + 5x$

How Students Think When Doing Algebra

Steve Rhine,Rachel Harrington,Colin Starr,2018-11-01 Algebra is the gateway to college and careers yet it functions as the eye of the needle because of low pass rates for the middle school high school course and students struggles to understand We have forty years of research that discusses the ways students think and their cognitive challenges as they engage with algebra This book is a response to the National Council of Teachers of Mathematics NCTM call to better link research and practice by capturing what we have learned about students algebraic thinking in a way that is usable by teachers as they prepare lessons or reflect on their experiences in the classroom Through a Fund for the Improvement of Post Secondary Education FIPSE grant 17 teachers and mathematics educators read through the past 40 years of research on students algebraic thinking to capture what might be useful information for teachers to know over 1000 articles altogether The resulting five domains addressed in the book Variables Peterson Leatham 2009 The purpose of this book is to accelerate early career teachers experience with how students think when doing algebra in middle or high school as well as to supplement veteran teachers knowledge of content and students The research that this book is based upon can provide teachers with insight into the nature of a student s struggles with particular algebraic ideas to help teachers identify patterns that imply underlying thinking Our book How Students Think When Doing Algebra is not intended to be a how to book for teachers Instead it is intended to orient new teachers to the ways students think and be a book that teachers at all points in their career continually pull of the shelf when they wonder how might my students struggle with this algebraic concept I am about to teach The primary audience for this book is early career mathematics teachers who don t have extensive experience working with students engaged in mathematics However the book can also be useful to veteran teachers to supplement their knowledge and is an ideal resource for mathematics educators who are preparing preservice teachers

Conform Glenn Beck,2014-05-06 Glenn Beck the New York Times bestselling author of The Great Reset considers the hot button issue of education in the US exposing the weaknesses of the Common Core school curriculum and examining why liberal solutions fail Public education is never mentioned in the constitution Why Because our founders knew that it was an issue for state and local governments not the federal one It s not a coincidence that the more the federal government has inserted itself into public education over the years the worse our kids have fared Washington dangles millions of dollars in front of states and then tells them what they have to do to get it It s backdoor nationalization of education and it s leading us to ruin In Conform Glenn Beck presents a well reasoned fact based analysis that proves it s not more money our schools need it s a complete

refocusing of their priorities and a total restructuring of their relationship with the federal government In the process he dismantles many of the common myths and talking points that are often heard by those who want to protect the status quo Critics of the current system are just teacher bashers Teachers unions put kids first Homeschooled kids suffer both academically and socially local control is an excuse to protect mediocrity Common Core is rigorous and state led Critics of Common Core are just conspiracy theorists Elementary school teachers need tenure We can't reform schools until we eradicate poverty school choice takes money away from public schools Charter schools perform poorly relative to public schools There is no issue more important to America's future than education The fact that we've yielded control over it to powerful unions and ideologically driven elitists is inexcusable We are failing ourselves our children and our country Conform gives parents the facts they need to take back the debate and help usher in a new era of education built around the commonsense principles of choice freedom and accountability

Differentiating Math Instruction, K-8 William N. Bender, 2013-09-11 Real time strategies for real life results Are you struggling to balance your students learning needs with their learning styles William Bender's new edition of this teacher favorite is like no other His is the only book that takes differentiated math instruction well into the twenty first century successfully blending the best of what technology has to offer with guidelines for meeting the objectives set forth by the Common Core Every innovation in math instruction is addressed Flipping math instruction Project based learning Using Khan Academy in the classroom Educational gaming Teaching for deeper conceptual understanding

Let's Play Math Denise Gaskins, 2012-09-04 Arithmetic Counts! Paul Shoecraft, 2025-01-24 Dr Shoecraft may be the only mathematician since the New Math in the 1960s to seriously analyze the lowly subject of arithmetic and how to teach it His breakthrough came when he experimented with teaching what needs to be understood instead of known memorized like teaching why addition problems until the algorithm they are using supposedly becomes cemented in their brains By teaching the essence of arithmetic in sensible ways and appealing to children's love of games songs and movement he's proven that virtually ALL children can learn arithmetic the foundation of algebra higher mathematics science technology and more even music When children understand arithmetic they own it It's no longer just their teacher's math It's their math America's children are being held back in math because of how arithmetic is drug out in elementary school Virtually every textbook based elementary school math program in use today is mind numbing in its repetitiveness from grade to grade The reason for the redundancy is to slow down the teaching of arithmetic so it can be memorized Research shows that the human brain is not designed to remember things learned by rote when no longer practiced That's acknowledged in the use it or lose it aphorism that states the obvious that we remember what we use and forget what we don't You know that to be true if you've ever forgotten things you once knew as well as your own name things like an old address or a license plate number Every child can understand base ten numeration when taught hands on with arithmetic blocks Thereby every child can understand base ten arithmetic And every child can learn how to count out the

number facts like $5 \times 7 = 12$, $17 \times 8 = 96$, $7 \times 42 = 5678$ and if they forget one never have to guess and risk ridicule and bad grades if they guess wrong. What matters in teaching arithmetic is not how much a child can remember but how much they can figure out if when they forget.
