On Carbohydrate Metabolism F. W. Pavy, 2016-12-21 Excerpt from *On Carbohydrate Metabolism A Course of Advanced Lectures in Physiology Delivered at the University of London May 1905 With an Appendix on the Assimilation of Carbohydrate Into Protein and Fat* AS an outcome Of the teaching of the glycogenic doctrine it is suggested that the transport Of sugar through the circulatory system to the systemic capillaries for oxidation and force production constitutes a necessary phenomenon Of life and upon these premises it is argued that a supply of carbohydrate food is needed by the diabetic In spite Of the circulatory system being charged with a redundancy Of sugar from which pernicious effects are being produced the supply Of carbohydrate with the attendant abnormal condition arising there from is to be maintained With the greatest confidence it can be affirmed that as a matter Of fact no principle Of action could be productive of more sinister results The glycogenic doctrine then stands far otherwise than in the position of a mere question of abstract science No less an important matter than the principle Of action to be put into force in the dietetic treatment Of diabetes is at stake in connection with it If physiology is to hold its right position and to act as a guiding instead Of a misleading factor in relation to medicine the interests Of medicine demand that the glycogenic doctrine Should be abandoned TO satisfy the requirements Of the case I consider it must be said that nothing short Of a clean page is needed upon which the subject must be treated upon different lines from those hitherto adopted TO Dr Selous and Dr Leslie Eastes I desire to tender my thanks for the assistance rendered by them in the preparation Of the sections of the villi depicted in this work and to Messrs W Watson Sons for the care bestowed upon the production of the photomicrographic illustrations TO Dr H W Bywaters I am indebted for the preparation Of the index and for much aid in carrying the work through the press About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
