Relaunch and touch the sky Subrata Dev Roy, We are more mature with all the experiences and knowledge that we have acquired. The problem is we focus on what we lack rather than what we are perfect and complete. There is nothing wrong with analyzing our weak points and working on them, but what we overlook in the areas where we are best, perfect and complete. There's a story about eagles: eagles live to be sixty to eighty years old. After reaching his forties, he goes into exile for nearly 100 days until the climax where he begins to pluck all his feathers and break his claws, the beak hitting the rocks. It starves for the next 100 days without any food until new feathers, beaks, and claws sprout. He resuscitates himself, lives newborn for the next 20 to 40 years. We humans are social animals who learn to live from the animals and birds around us. Let's practice like how an eagle works to resuscitate itself in our way to focus on the physical aspects while spending more time on our health through regular exercise, good nutrition, and disciplined life. Let's not be demoralized by age. Age is just a number. Let's work on the positive side of improving and upgrading our skills. Stay Hungry, Stay Foolish. Let's live every moment of our life and have fun like this is going to be the last day of our lives, but keep learning every moment as if we are going to live like an immortal forever. Remember that reaching quarantine

is not a curse but a blessing in disguise Did you know that lions only succeed in a quarter of their hunting attempts which means they fail 75% of their attempts and only succeed 25% of them Despite this small percentage shared by most predators they do not despair in their pursuit and hunting attempts The main reason for this is not because of hunger as some might think but it is the understanding of the law of wasted effort which was instinctively incorporated into animals a law in which nature is ruled Half of the fish eggs are eaten half of the baby bears die before puberty most of the world's rains fall in the oceans and most tree seeds are eaten by birds Scientists have found that animals trees and other forces of nature are more receptive to the law of wasted effort Only humans think that the lack of success in a few attempts is a failure but the truth is we only fail when we stop trying Success is not about having a life without pitfalls and falls but success is about overcoming your mistakes and going beyond every step where your efforts have been wasted waiting for the next step If there is one word that sums up this world it will simply be start over Always be inspired
