The newly revised and thoroughly updated Third Edition of this classic and popular text *Antennas and Propagation for Wireless Communication Systems* addresses fundamentals and practical applications of antennas and radio propagation commonly used in modern wireless communication systems, from the basic electromagnetic principles to the characteristics of the technology employed in the most recent systems deployed, with an outlook of forthcoming developments in the field. Core topics include fundamental electromagnetic principles underlying propagation and antennas, basic concepts of antennas and their application to specific wireless systems, propagation measurement, modelling and prediction for fixed links, macrocells, microcells, femtocells, picocells, megacells, and narrowband and wideband channel modelling with the effect of the channel on communication system performance. Worked examples and specific assignments for students are presented throughout the text, with a solutions manual available for course tutors, with a dedicated website containing online calculators and additional resources, plus details of simple measurements that students can perform with off the shelf equipment such as their laptops and a Wi-Fi card. This Third Edition of *Antennas and Propagation for Wireless Communication Systems* has been thoroughly revised and updated, expanding on and adding brand new coverage of sample topics such as Maxwell's equations and EM theory, multiple reflections as propagation mechanisms, and waveguiding, HAPS, High Altitude Platforms, propagation design, and noise considerations of earth stations, macrocell models, and cellular base station site engineering, FSS, frequency selective surfaces, adaptive antenna theory, developments in massive and distributed MIMO, in particular, and how to process raw data related to channel measurements for mobile radio systems. The techniques used in mobile systems spanning the latest 4G, 5G, and 6G technology generations. A wider range of frequencies extending from HF, VHF, and UHF up to the latest millimetre wave and sub-terahertz bands.
