This is the first book to examine the partially hidden history of metal music scenes within the city of Liverpool and the surrounding region of Merseyside in the North West of England. It reveals that while Liverpool has historically been portrayed as a certain kind of music city, metal has been marginalized within its music heritage narratives. This marginality was not inevitable. The book illustrates how it is not merely the product of historical representation but the result of forces of urban change and regional shifts in the economy of live music. Nor is this marginality inconsequential. Drawing on ethnographic research, Nedim Hassan demonstrates that it has influenced how the region's metal scenes are perceived and how people feel towards them. *Metal on Merseyside* reveals how various people involved with such scenes work within often challenging circumstances to sustain the production of metal music and events. It also reveals the tensions that arise as scene members' desires for an ideal metal community collide with forces of change. *Metal on Merseyside* is therefore a fascinating barometer for the contradictions apparent when people engage in creative labour to produce music that they love.

Metal, Rap, and Electro in Post-Revolutionary Tunisia Stefano Barone, 2019-04-23 *Metal Rap and Electro in Tunisia* is a trip into the music scenes of Tunisia after the Arab Springs. Based on extensive field research, the book explores the social life of heavy metal, rap, and electronic music in a North African country whose mass revolution of 2010-2011 led the way to a troubled and yet unique democracy. What is it like to be part of a music scene in a place affected by poverty and inequality? How do the many conflicted souls of Tunisian Islam shape local metal, rap, and electro? What are the social and cultural stakes for music in a nation constantly represented as a bridge between Europe and the Middle East? How do music scenes articulate the complex political scenario that followed the Tunisian revolution of 2011? Barone answers these questions by offering new theoretical reflections on youth cultures and popular music in a global perspective and thus pushing the debate on post-subcultures and scenes forward. At the same time, the book offers a dense sociological analysis of youth and music in reality: the Tunisian one, whose society, culture, religion, and politics are at stake in a historical transformation.

Weapons and Tools in Rock Art Ana M. S. Bettencourt, Manuel Santos-Estévez, Hugo Aluísio Sampaio, 2021-03-03 *Weapons and tools* are frequently found depicted in rock art in many parts of the globe and different periods and in varying social contexts. This collection of papers by leading rock art specialists examines the subjective and metaphorical value of weapons and tools in art: the actions that created them and their contexts. It also takes into account that such representations incorporate and transmit some kind of understanding about the world and the relationship between objects and humans. Contributors analyse objects and weapons as status symbols, as evidences of cultural contacts, as ideological devices, etc. Divided into regional sections which for once do not focus on Scandinavia, chapters deal with the representations of weapons and certain kinds of tools such as axes and sickles in different prehistoric, protohistoric, and traditional community contexts all over the world. Attention focuses on rock art but also looks at stelae and statue menhirs as well as other kinds of container or vehicle for this kind of depiction. The major concern is to discuss the possible meanings of these embodied signs in different areas and periods, since meanings

are permeable both to time and space Papers either centre their attention in broader approaches based on a specific area region or people or focus on particular case studies Res: Anthropology and Aesthetics, 52 Francesco Pellizzi, 2008-02-15 Res is a journal of anthropology and comparative aesthetics dedicated to the study of the object in particular cult and belief objects and objects of art The journal presents contributions by philosophers art historians archaeologists critics linguists architects artists among others The Land Within Pedro García Hierro, 2005 By describing the fabric of relationships indigenous peoples weave with their environment The Land Within attempts to define a more precise notion of indigenous territoriality A large part of the work of titling the South American indigenous territories may now be completed but this book aims to demonstrate that in addition to management these territories involve many other complex aspects that must not be overlooked if the risk of losing these areas to settlers or extraction companies is to be avoided Alexandre Surralls holds a doctorate in anthropology from the School for Higher Studies in Social Sciences and is a researcher on the staff of the National Centre for Scientific Research Pedro Garca Hierro is a lawyer from Madrid Complutense University and the Pontifical Catholic University of Peru He has worked with various indigenous organizations on issues related to the identification and development of collective rights and the promotion of intercultural democratic reforms
