Antioxidant Properties Of Spices Herbs And Other Sources:

Antioxidant Properties of Spices, Herbs and Other Sources Denys J. Charles, 2012-11-27 The scientific world and modern society today is experiencing the dawning of an era of herbal medicine Extensive research has shown that aromatic plants are important anti inflammatory antioxidant anti aging and immune boosting delectable foods with the magic and miracle to boost our immune system providing us with extended and an improved quality of life Apart from making bland recipes into welcoming or interesting victories herbs and spices have stirred the minds of the research community to look deeper into its active components from a functional perspective It is essential to present the scientific and medicinal aspect of herbs and spices together with the analysis of constituents its medicinal application toxicology and its physiological effects Herbs and spices with high levels of antioxidants are in great demand as they tend to promote health and prevent diseases naturally assuring increased safety and reliability for consumers Herbs and spices are not only known for taste and flavor but today research has opened up a new realm in which the antioxidant properties of these aromatic plants provide preservation for foods and health benefits for consumers who look forward to concrete scientific research to guide them further and explore herbal medicine The aim of this book is to create awareness in society about the reliability of medicinal properties of certain herbs and spices through scientific and scholarly research Antioxidant Properties of Spices, Herbs and Other Sources Springer, 2012-11-26 *Plant and Human Health, Volume 2* Munir Ozturk, Khalid Rehman Hakeem, 2019-01-22 Early anthropological evidence for plant use as medicine is 60 000 years old as reported from the Neanderthal grave in Iraq The importance of plants as medicine is further supported by archeological evidence from Asia and the Middle East Today around 1.4 billion people in South Asia alone have no access to modern health care and rely instead on traditional medicine to alleviate various symptoms On a global basis approximately 50 to 80 thousand plant species are used either natively or as pharmaceutical derivatives for life threatening conditions that include diabetes hypertension and cancers As the demand for plant based medicine rises there is an unmet need to investigate the quality safety and efficacy of these herbals by the scientific methods Current research on drug discovery from medicinal plants involves a multifaceted approach combining botanical phytochemical analytical and molecular techniques For instance high throughput robotic screens have been developed by industry it is now possible to carry out 50 000 tests per day in the search for compounds which act on a key enzyme or a subset of receptors This and other bioassays thus offer hope that one may eventually identify compounds for treating a variety of diseases or conditions However drug development from natural products is not without its problems Frequent challenges encountered include the procurement of raw materials the selection and implementation of appropriate high throughput bioassays and the scaling up of preparative procedures Research scientists should therefore arm themselves with the right tools and knowledge in order to harness the vast potentials of plant based therapeutics The main objective of *Plant and Human Health* is to serve as a comprehensive guide for this endeavor Volume 1 highlights how humans from

specific areas or cultures use indigenous plants Despite technological developments herbal drugs still occupy a preferential place in a majority of the population in the third world and have slowly taken roots as alternative medicine in the West The integration of modern science with traditional uses of herbal drugs is important for our understanding of this ethnobotanical relationship Volume 2 deals with the phytochemical and molecular characterization of herbal medicine Specifically It will focus on the secondary metabolic compounds which afford protection against diseases Lastly Volume 3 focuses on the physiological mechanisms by which the active ingredients of medicinal plants serve to improve human health Together this three volume collection intends to bridge the gap for herbalists traditional and modern medical practitioners and students and researchers in botany and horticulture
