Antisocial Media Greg Goldberg, 2018-01-16 Introduction Anxiety and the antisocial Playing Automating Sharing Epilogue immaterial world

Digital Populism and the Use of Neo-Propaganda and Fake News Vieira, Andreia Teles, Joaquim, Ana Filipa, Duarte, Alexandre, 2025-05-07 As populism grows across global democracies the integration of new technologies has significantly amplified the use of propaganda techniques and the spread of fake news Tools like social media and artificial intelligence AI make digital technologies privileged vehicles for populist communication Due to the use of fallacies propaganda is confused with fake news though these techniques are broader and based on political strategies to manipulate public opinion With the advent of new technologies and the ever increasing incorporation of AI into social life political parties are facing a form of two way communication without intermediaries meaning they can directly reach and influence the public with reduced costs Understanding the social impact of digital propaganda may help foster political literacy among civil society

Digital Populism and the Use of Neo Propaganda and Fake News explores various populist parties aiming to identify and understand their use of propaganda and fake news It provides a comprehensive global vision of populism in different nations and examines the communication strategies based on propaganda and disinformation Covering topics such as social media computational propaganda and political rhetoric this book is an excellent resource for political analysts journalists sociologists government officials policymakers researchers academicians and more

Media Capitalism Thomas Klikauer, 2022-01-01 This book argues that media and capitalism no longer exist as separated entities and posits three reasons why one can no longer exist without the other Firstly mass media have become indispensable to capitalism due to the media's ability to sell the commodities of mass consumerism Media capitalism also creates pro capital attitudes among a target population and establishes an ideological hegemony Thirdly media capitalism provides mass deception to hide the pathologies of capitalism which include mass poverty rising inequalities and the acceleration of global warming To illuminate this the book's historical chapter traces the emergence of media capitalism Its subsequent chapters show how media capitalism has infiltrated the public sphere society schools universities the world of work and finally democracy The book concludes by outlining how societies can transition from media capitalism to a post media capitalist society

Humanism in the Modern World Jeff Radwell, 2025-02-27 In an era of misinformation digital spectacle and declining literacy this book examines the historical resilience of humanism and the challenges it faces in the modern world From the Renaissance scholars who revived intellectual inquiry to the revolutionary salons labor halls and universities that fostered debate and dissent humanist thought has always thrived in moments of resistance But today new forces algorithmic manipulation social media driven self worth and the dominance of visual culture threaten to erode the very foundations of reason autonomy and personal dignity This book explores how humanist values have historically been challenged and how they prevailed offering a comparative analysis between past intellectual struggles and today's crises of thought and identity It delves into how the

digital age while democratizing information has also fragmented attention heightened social comparison and replaced depth with spectacle The decline of reading culture the rise of aestheticized self worth and the transformation of universities into elite corporatized institutions have all contributed to an environment where critical thinking is devalued history is flattened and intellectual engagement is increasingly passive Yet as history shows humanist resistance adapts This book does not merely diagnose the problem it seeks solutions exploring how modern intellectuals digital creators and educators can reclaim humanism for a new age From rethinking the role of universities to fostering meaningful discourse in digital spaces it argues that humanism must evolve without surrendering to a surface level algorithmic world By drawing lessons from the past and applying them to the present this book offers a roadmap for reviving intellectual depth reinforcing individual autonomy and ensuring that humanism remains a guiding force in an increasingly mechanized and visually driven society It is a call to resist intellectual passivity to reclaim knowledge as a public good and to defend the essential humanist belief that self worth is not found in metrics but in thought creativity and the lifelong pursuit of meaning

Pragmatics of Social Media Christian Hoffmann, Wolfram Bublitz, 2017-09-11 This handbook provides a comprehensive overview of the pragmatics of social media i.e. of digitally mediated and Internet based platforms which are interactively used to share and edit self and other generated textual and audio visual messages Its five parts offer state of the art reviews and critical evaluations in the light of on going developments Part I The Nature of Social Media sets up the conceptual groundwork as it explores key concept such as social media participation privacy publicness Part II Social Media Platforms focuses on the pragmatics of single platforms such as YouTube Facebook Part III Social Media and Discourse covers the micro and macro level organization of social media discourse while Part IV Social Media and Identity reveals the multifarious ways in which users collectively re construct aspects of their identities Part V Social Media and Functions Speech Acts surveys pragmatic studies on speech act functions such as disagreeing complimenting requesting Each contribution provides a state of the art review together with a critical evaluation of the existing research

Lost Teens Lost Faith Derek Bird, 2016-01-14 Commonly previous generations of Christian culture emphasize issues that were pertinent to them and they teach key doctrinal concepts while neglecting that which is essential to the healthy development of a Christian teen In his book Bird encourages a balanced approach while exploring faith issues most relevant to teens as they approach the years when theyre forced to grapple with enormous decisions More specifically he uncovers an innovative way to think about Gods purpose for an individuals life which has the potential to not only affect the way teens approach life but may also challenge parents and leaders to re prioritize their own schedules and then goes on to uncover a biblically based model for understanding Gods will which happens to be conveniently situated at the center of his purpose for humanity At a time when its more common for a teen to walk away from the faith than it is for them to remain engaged *Lost Teens Lost Faith* provides relevant dialogue generated out of Birds experience and his deep desire to see the reversal of this tragic trend What he uncovers and passes along provides parents

with the necessary foundation to lead their children through some of life's greatest challenges. Birds scripturally inspired ideas give parents and teens a framework to begin a conversation of eternal importance.

Expressive Networks Matthew Kilbane, 2025-06-10 *Expressive Networks* convenes an urgent conversation on digital media and the social life of contemporary poetry. Tracing how poems circulate through online spaces and how capitalized platforms have come to pattern the reading and writing of poetry, contributors emphasize both the expressivist cast of digital literary culture and the deep running ambivalence that characterizes aesthetic and critical responses to platformed cultural production. The volume features chapters on Pan African spoken word programs, Singaporean Facebook groups, decolonial hemispheric networks, and Japanese media critical poetics, as well as platforms such as Twitter, X, Instagram, and Amazon. Though contributors write from a variety of methodological positions and address themselves to a range of archives, they share the primary conviction that the impact of Web 2.0 on literary practice is far reaching, far from self-evident, and far more variegated and unpredictable than easy summations of social media's influence suggest. *Expressive Networks* asks after poetry's present and future by examining what poems themselves express about the social make-up of networked platforms. Edited by Matthew Kilbane, with contributions from Cameron Awkward Rich, Micah Bateman, Andrew Campana, Sumita Chakraborty, Scott Challenger, C. R. Grimmer, Tess McNulty, Michael Nardone, Seth Perlow, Anna Preus, Susanna Sacks, Carly Schnitzler, Melanie Walsh, and Samuel Caleb Wee.

Mediatizing the Nation, Ordering the World Andrew Dougall, 2024-08-19 This book offers a timely and engaging account of how technologies of communication media impact nationalist challenges to global order, shedding new light on how they matter, how they have changed, and how their evolution transforms the conditions of possibility for nationalist order. In the 21st century, we have become accustomed to close entanglements between resurgent nationalism and digital media. In *Mediatizing the Nation, Ordering the World*, Andrew Dougall shows that the relationship between media and nationalist order contestation is far older. Comparing Trump's breakthrough in the 21st century United States with a similar but unsuccessful movement in 19th century Britain, the book argues that communication media shaped these episodes by differently patterning the constitution and distribution of meaning on which they relied. Underpinning this argument is a novel theorization of media in world politics that draws on insights from media and communications scholarship in addition to international relations. Among the book's key contributions are to explain how media affect vertical challenges to the structure of international orders, to reframe IR's theoretical engagement with the relationship between media and order, and to situate the internet within a longer history of this relationship, contributing to a more balanced view of its impact.

American Revolutions in the Digital Age Nora Slonimsky, Mark Boonshoft, Ben Wright, 2024-08-15 The interdisciplinary essays in *American Revolutions in the Digital Age* explore what digital tools can tell us about the late eighteenth and early nineteenth century United States and reveal how an understanding of the American past can make sense of our digital present. By employing a host of innovative digital research methods, these authors

challenge long held assumptions about the American past In addition this collection uniquely demonstrates how contemporary anxieties about an array of topics including media disinformation patriarchy economic inequality and public memory can be better understood through careful considerations of early American history Open Access edition funded by Iona University

The Harms of Beauty Sam Barnes, 2025-04-30 The beauty industry thrives on creating a sense of dissatisfaction with appearance with social media adding pressure to conform to idealized images of beauty This has led to a growing use of products for bodily improvement such as facial injectables and weight loss drugs which have arguably become increasingly normalized throughout society This groundbreaking ethnographic study lifts the lid on the dark side of beauty revealing why young people are willing to inflict self harm in the pursuit of perfection and exploring the motivations for using buying and selling counterfeit beauty products and services
