Diversifying Digital Learning William G. Tierney,Zoë B. Corwin,Amanda Ochsner,2018-02 Many Schools and programs in low income neighborhoods lack access to the technological resources that those in middle and upper income neighborhoods have at their fingertips This inequity creates a persistent divide in both formal and informal digital literacy that further marginalizes youths from minority and first generation communities Diversifying Digital Learning outlines the pervasive problems that exist with ensuring digital equity and identifies successful strategies to tackle the issue Bringing together top scholars to discuss how digital equity in education might become a key goal in American education this book is structured to provide a framework for understanding how historically underrepresented students most effectively engage with technology and how institutions may help or hinder students ability to develop and capitalize on digital literacies Addressing the intersection of digital media race ethnicity and socioeconomic class in a frank manner the lessons within this compelling work will help educators enable students in grades K 12 as well as in postsecondary institutions to participate in a rapidly changing world framed by shifting new media technologies
