This text presents research and a market tested decision framework for comparative law, market practice and human nature in the vital strategic oversight role of governance. Too often lessons learned from centuries of law are overlooked. The chapters are a dozen inquiries into recurring problems in the boardroom. Part one is an entry level technical reference of law and governance principles. Unique appendices of keywords and case notes will aid those new to markets governed by the western rule of law and those tripping on gaps in comparative jargon. Part two is a series of practical hot topics in the context of law and governance. Part three looks to next steps in accountability and liability. The text will help accountants, engineers, lawyers and business operations and market policy experts from around the world work together and professors, professionals and students anticipate change. After drilling through accountability and liability for hybrid

organizations typical crises are revealed to be from a lack of aligning interests and related information churn
