Dynamic Quality Management for Cloud Labor Services Robert Kern, 2014-09-06 How can a scalable and efficient
quality management mechanism for cloud labor services be designed in a way that it delivers results with a well defined level
of quality to the requester Cloud labor services are a specific form of crowdsourcing A coordination platform serves as an
interface between requesters who need to get work done and a large crowd of workers who want to perform work An early
example of such a platform is Amazon's Web marketplace Mturk on which service requesters can publish open calls for so

called human intelligence tasks HITs Robert Kern's work makes a considerable contribution toward solving the quality problem for scalable human work On the basis of a comprehensive framework of cloud labor he develops a set of methods to conceptually measure and aggregate the quality of human work results implements a platform to put those methods to work and evaluates their application in a number of very compelling real world scenarios successfully combining concepts from statistics information technology and management Reading this book will be beneficial to novices in cloud labor services looking for orientation in this new field as well as to advanced researchers and practitioners developing cloud quality concepts
