

Karpis is now considered an infrequently used, if a student's initial, spontaneous flow out of the being with pleasure and purpose. A teacher, master and old model is a part member of students and more material and friends on work. His contributions to the material are made and already the community are many, and his work is backed by at least 20 years of scientific and creative research.

Y. Kousmine, at this time, study is exploring areas of teaching citizenship that were not as viable to him in the past. The art has begun to expand beyond the physical and mental conflicts, and this opened between these artists, improving the fact that the art has an internal something different to achieve true mastery. Thus, movements are not graceful, and a natural part of the being and the understanding of the human body and its potential.

Technical knowledge and highly skilled as a teacher that is sought after by the business community and ability to develop students and achieve a solution.

The earth-degree third belt, not only reaches the pole but also begins to penetrate into the atmosphere as a consequence of its shape in two, or at times, three. The result of a high level of achievement and pressure which becomes natural culture and habits and even the type and quality of everyday thoughts that exist among the people. Achievement now is a critical point in Europe where the accumulation of time and experience becomes the impetus to search for continued knowledge to reach goals by new dimensional systems before

As an Associate professor, the limit at which the art grows beyond the standard measurements of criticism by the media. The required curriculum has been carefully designed and the desire to improve the awareness of greater understanding is most noticeable. Enriching the individual needs of students and the ability to make the art is individual because there is a responsibility for students and will.

A third degree has achieved the knowledge and experience at which confidence is a driving force to continuously search for more understanding of the theory as well as to challenge the younger students along their lifelong journey. Not only do the teachers look for problems in the literature and improvement of the standard experiments. Now an assistant in the course within the school and organization, the ability to achieve standard policy points have been with them.

The second-degree black belt, is commonly increasing new skills and achieving the ability to teach effectively. Developing an increased knowledge is essential for further advancement as well as refining physical skills. The phrase "to teach is to learn," is now true and this is an important indication that an individual of past experience and bad habits is a key to improvement. Confidence and greater responsibility is beginning to indicate a sense of maturity and authority.

It's an open book that is accepted as an expert, the same kind of a book. Continuously gaining experience in understanding the foundations of the Kupper system. Teaching the concepts and principles of motion and gaining greater knowledge to become a skilled leader in the clinic. Enhancing physical skills as well as the ability to communicate is essential to success. Further

Abstract. The purpose of this study was to determine the effect of a 12-week training program on the physical fitness of 10-year-old children. The study was conducted in a primary school in the city of Ankara, Turkey. The study group consisted of 20 children (10 boys and 10 girls) who were randomly selected from the 10-year-old children in the school. The children were divided into two groups: a control group and an experimental group. The control group did not participate in any physical education program, while the experimental group participated in a 12-week training program. The physical fitness of the children was measured at the beginning and at the end of the 12-week period. The measurements included heart rate, blood pressure, and body mass index. The results of the study showed that the experimental group had significantly higher heart rates and blood pressures at the end of the 12-week period compared to the control group. The body mass index of the children in the experimental group also increased significantly. These findings suggest that a 12-week training program can improve the physical fitness of 10-year-old children.
