This book examines the evolving representations of the colonial past from the mid 19th century up to decolonization in the 1960s and 70s, the so-called era of Modern Imperialism, in post-war history textbooks from across the world. The aim of the book is to examine the evolving outlook of colonial representations in history education and the underpinning explanations for the specific outlook in different former colonizer and colonized countries to be found in collective memory, popular historical culture, social representations, identity building processes, and the state of historical knowledge within academia.

The approach of the book is novel and innovative in different ways. First of all, given the complexity of the research, an original interdisciplinary approach has been implemented which brings together historians, history educators, and social psychologists to examine representations of colonialism in history education in different countries around the world while drawing on different theoretical frameworks. Secondly, given the interest in the interplay between collective memory, popular historical culture, social representations, and the state of historical knowledge within academia, a diachronic approach is implemented, examining the evolving representations of the colonial past and connecting them to developments within society at large and academia. This will allow for a deeper understanding of the processes under examination. Thirdly, studies from various corners of the world are included in the book. More specifically, the project includes research from three categories of countries: former colonizer countries including England, Spain, Italy, France, Portugal, and Belgium; countries having been both colonized and colonizer, Chile; and former colonized countries including Zimbabwe, Malta, and Mozambique. This selection allows pairing up the countries under review as former colonizing/colonized ones, for instance, Portugal/Mozambique, United Kingdom/Malta, allowing for an in-depth comparison between the countries involved. Before reaching the research core, three introductory chapters outline three general issues. The book starts with addressing the different approaches and epistemological underpinnings of history and social psychology as academic disciplines hold. In a second chapter, evolutions within international academic colonial historiography are analyzed with a special focus on the recent development of New Imperial History. A third chapter analyses history textbooks as cultural tools and political means of transmitting historical knowledge and representations across generations. The next ten chapters form the core of the book in which evolving representations of colonial history from mid 19th century until decolonization in the 1960s and 1970s are examined, explained, and reflected upon for the above-mentioned countries. This is done through a history textbook analysis in a diachronic perspective. For some countries, the analysis dates back to textbooks published after the Second World War; for other countries, the focus will be more limited in time. The research presented is done by historians and history educators as well as by social psychologists. In a concluding chapter, an overall overview is presented in which similarities and differences throughout the case studies are identified, interpreted, and reflected upon.

*The Battle of Britain in the Modern Age, 1965–2020* Garry Campion, 2019-09-26

The Battle of Britain has held an enchanted place in British popular history and memory throughout the modern era. Its transition from history to heritage since 1965 confirms that the 1940 narrative shaped by the State has been sustained by historians, the media, popular culture, and through non-governmental heritage sites, often with financing from the National Lottery Heritage Fund. Garry Campion evaluates the Battle's revered place in British society and its influence on national identity, considering its historiography and revisionism, the postwar lives of the Few, their leaders, and memorialization, its depictions on screen and in commercial products, the RAF Museum's Battle of Britain Hall, third sector heritage attractions, and finally fighter airfields including RAF Hawkinge as a case study. A follow-up to Campion's *The Battle*

of Britain 1945 1965 Palgrave 2015 this book offers an engaging accessible study of the Battle s afterlives in scholarship memorialization and popular culture      *Public History* Thomas Cauvin,2016-05-20 Public History A Textbook of Practice is a guide to the many challenges historians face while teaching learning and practicing public history Historians can play a dynamic and essential role in contributing to public understanding of the past and those who work in historic preservation in museums and archives in government agencies as consultants as oral historians or who manage crowdsourcing projects need very specific skills This book links theory and practice and provides students and practitioners with the tools to do public history in a wide range of settings The text engages throughout with key issues such as public participation digital tools and media and the internationalization of public history Part One focuses on public history sources and offers an overview of the creation collection management and preservation of public history materials archives material culture oral materials or digital sources Chapters cover sites and institutions such as archival repositories and museums historic buildings and structures and different practices such as collection management preservation archives objects sounds moving images buildings sites and landscape oral history and genealogy Part Two deals with the different ways in which public historians can produce historical narratives through different media including exhibitions film writing and digital tools The last part explores the challenges and ethical issues that public historians will encounter when working with different communities and institutions Either in public history methods courses or as a resource for practicing public historians this book lays the groundwork for making meaningful connections between historical sources and popular audiences      **Toward Decentering**
