Imposing Regulation on Advanced Algorithms Fotios Fitsilis, 2019-09-03 This book discusses the necessity and perhaps urgency for the regulation of algorithms on which new technologies rely. Technologies that have the potential to reshape human societies. From commerce and farming to medical care and education, it is difficult to find any aspect of our lives that will not be affected by these emerging technologies. At the same time, artificial intelligence, deep learning, machine learning, cognitive computing, blockchain, virtual reality and augmented reality belong to the fields most likely to affect law and in particular administrative law. The book examines universally applicable patterns in administrative decisions and judicial rulings. First, similarities and divergence in behavior among the different cases are identified by analyzing parameters ranging from geographical location and administrative decisions to judicial reasoning and legal basis. As it turns out, in several of the cases presented, sources of general law such as competition or labor law are invoked as a legal basis due to the lack of current specialized legislation. This book also investigates the role and significance of national and indeed supranational regulatory bodies for advanced algorithms and considers ENISA, an EU agency that focuses on network and information security, as an interesting candidate for a European regulator of advanced algorithms. Lastly, it discusses the involvement of representative institutions in algorithmic regulation.

Comparative Consumer Sales Law Geraint Howells, Christian Twigg-Flesner, Hans-W. Micklitz, Chen Lei, 2017-12-06 For many years, legislators around the world have responded to the particular needs of consumers by introducing dedicated rules for consumer sales contracts. In the European

Union a significant push came through the adoption of the Consumer Sales Directive 99/44/EC. Elsewhere in the world legislation focusing on consumer sales contracts has been introduced for example in New Zealand and Australia. This book offers a snapshot of the current state of consumer sales law in a range of jurisdictions around the globe. It provides both an overview of the law in selected jurisdictions and compares the application of these rules in the context of two case scenarios.
