BEYOND GODS AND SCRIPTURES Joseph Mani, 2018-05-07 Religion has been the biggest divisive force in history This book examines the irrational and harmful beliefs of religious people which lead to religion becoming a destructive force Religion can be and has been a force for good too What are the aspects of religion that make it meaningful Does God exist The book details the scientific and philosophical arguments adduced for God's existence and how valid they are In the last section we look at five luminaries of science who either had close encounters with religious establishments or had strong views on religion and God We look at the lives of Copernicus Galileo Newton Einstein and Hawking not so much as scientists but as human beings with their own kinks and idiosyncrasies The author brings to this book his extensive knowledge of physics philosophy religion and the behavioural sciences

American River Road Beyond 2017 John Worker for Jesus Christ, 2014-05-02 The 1960s saw the dawn of manned space flights and America quickly recognized its destiny to seek out things beyond earth Despite the nations external wars and internal conflicts the sky and the future possessed our imaginations People had so much hope so much looking forward We were living American Pie years before the song with that title would come out Today my soul longs for the innocence of that childhood view In those days of long ago friends and I preferred to be outside throwing a ball searching for new finds walking through fields and forests looking up We never kept in touch Where are they now Do they feel as alone as I do My chest aches like an old hollow log its emptiness filled with pangs of joyful memories of things once whole a family a neighborhood a nation A lost time it is a lost spirit am I and inside me lives a heart that weeps for a dying country The mortal situation is so clear Together let us travel a 50 year American river road of loves sharp curves deaths hazardous potholes and murders sudden downhill drops We will dive into the polluted river of the decayed American soul descend to its very bottom and crawl in the muck We will then swim up and out of the river onto its opposite shore to begin our walk through swamps and forests that lead to a steep uphill climb to an incredible place of panoramic view The driver John Worker asks that the reader not become overly shaken as he steers you through a dark valley of personal reflection that you courageously survive it get through it because well you will find out when you get to the top of the other side The Threshold of Eternal Life

Beyond 2012: Catastrophe or Awakening? Geoff Stray, 2009-05-21 An illustrated encyclopedic overview of the prophecies calendars and theories that indicate the year 2012 is a threshold of great change for humanity Looks at the scientific and anthropological evidence for the rare galactic alignment due to occur in December 2012 Sifts through the catastrophic theories to show what we might really expect in 2012 In December of 2012 the Mayan Calendar's Great Cycle will come to an end Opinion remains divided as to whether apocalyptic scenarios of worldwide destruction or utopian visions of a spiritually renewed humanity will prevail after this key date has passed What is certain however is that a rare galactic alignment will occur one so unique that it is found at the core of many wisdom traditions from around the globe Geoff Stray has been collecting the vast amounts of data relating to the 2012 phenomena since 1982 Far from confining his research to the Maya who provide the most prominent predictions indicating this date will herald significant changes for humanity he has studied the prophetic traditions of other cultures including the Tibetan Chinese Jewish Ethiopian and tribal cultures from around the globe to show the kind of convergence of cosmic purposes happening along a number of parallel tracks This book offers an extensive study of many modern theories including Terence McKenna's timewave zero and Maurice Cotterell's sunspot research as well as anomalous phenomena such as near death experiences and crop circles Sifting through all the scientific research and speculation that the year 2012 has inspired Geoff Stray provides an encyclopedic look at what we might really expect on this pivotal date
