

OPENING

Retractable roof

Precautions to be taken before operating the roof

- Park the vehicle on level ground.
- Check that no object could hinder the operation of the roof:
 - nothing should be placed on the moving rear shelf 1 or on the net 2.
 - if luggage is being carried in the boot, it must not raise the net.
- Ensure that the net 2 is secure.
- Close the boot correctly.

The roof is operated under the sole responsibility of the driver. During operation of the roof, to avoid the risk of injury, ensure that no one is in the vicinity of the moving parts.

You are strongly advised not to operate the roof in strong winds.

When washing your vehicle:

- lock the vehicle,
- avoid spraying the upper part of the windows,
- keep the end of the high-pressure nozzle at least 1 metre from the windows and door seals.

After washing the vehicle or following rain, wait until the roof has dried before opening it.

Preliminary conditions

- Switch on the ignition.
- Ensure that:
 - the vehicle is not in energy economy mode (refer to the corresponding section),
 - the battery voltage is sufficient (switching on of the indicator lamp on the roof control),
 - the roof fuse is in good condition (refer to the corresponding section),
 - the electric windows are initialised (refer to the corresponding section),
 - the ambient temperature is above -15 °C,

It is preferable to operate the roof with the engine running.

The roof can be operated at speeds below 6 mph (10 km/h).

It is only possible to carry out the operation twice with the engine off, to prevent discharging of the battery.

Maintenance

Carry out a complete roof operation at least once a month to keep it in good working order.
