

1 Minute Self-Introduction Speech

Good morning/afternoon/evening, everyone.

My name is Alex Johnson, and I'm a recent graduate from the University of Technology, where I majored in Computer Science with a focus on artificial intelligence and machine learning.

Over the past few years, I've interned at innovative tech companies like Innovatech Solutions and TechPioneers, where I had the opportunity to contribute to cutting-edge projects aimed at optimizing smart home technologies through AI. These experiences not only sharpened my technical skills but also taught me the importance of teamwork and adaptability in fast-paced environments.

I'm deeply passionate about leveraging technology to solve real-world problems, especially in the realm of environmental sustainability. My senior project, which developed an AI-driven system to reduce energy consumption in residential buildings, was awarded the university's Innovation Challenge prize.

I'm currently seeking opportunities where I can contribute my skills in AI and machine learning to make a significant impact in the tech industry, particularly in companies that value innovation and sustainability.

Introduction to Nuclear Techniques in Agronomy and Plant Biology Peter B. Vose, 2013-10-22 Introduction to Nuclear Techniques in Agronomy and Plant Biology is a 15-chapter book that begins with an explanation of the nature of isotopes and radiation, nuclear reactions, and radioisotopes. Subsequent chapters describe the radioassay, use of stable isotopes as tracers, and activation analysis for biological samples. Other chapters discuss X-ray fluorescence spectrography for plants and soils, autoradiography, isotopes in soils studies, isotopic tracers in field experimentation, and nuclear techniques in plant science and soil water. The last chapter centers on the radiation and other induced mutations in plant breeding.

[Towards a New Paradigm for English Language Teaching](#) Hajime Terauchi, Judy Noguchi, Akira Tajino, 2019-10-30 This book proposes a new paradigm for English language teaching based on concepts from English for Specific Purposes (ESP) research and applications, as well as from growing evidence relating pattern recognition to language learning ability. The contributors to the volume argue that learners should not try to become proficient all-around users of idealistic native-like English, but instead should be realistic about what they need to acquire and how to go about achieving their specific goals. The book discusses the present situation by describing the status quo of English language education in Japan, taking into consideration recent trends of CLIL, content and language integrated learning (EMI), English medium instruction, and TBLT (task-based language teaching), as well as the work done on the Common European Framework of Reference for Languages (CEFR). It introduces new movements in ESP.

in Japan and in other Asian regions covering topics ranging from genre analysis to corpus linguistics and presents application examples of ESP practice in a range of educational situations in Japan from the graduate school level to elementary and middle school contexts It also offers readers application examples of ESP practice in a range of business settings and expands the discussion to the global sphere where EAP and ESP are gaining importance as the number of ELF English as a Lingua Franca speakers continue to increase The book will be of great interest to academics researchers and post graduate students working in the fields of EFL and ESL

Resources in Education, 1995 *Natural Gas Conversion V A*. Parmaliana, D. Sanfilippo, F. Frusteri, A. Vaccari, F. Arena, 1998-09-17 On January 1988 the ascertained and economically accessible reserves of Natural Gas NG amounted to over 144 000 billion cubic meters worldwide corresponding to 124 billion tons of oil equivalents comparable with the liquid oil reserves which are estimated to be 138 billion TOE It is hypothesized that the volume of NG reserve will continue to grow at the same rate of the last decade Forecasts on production indicate a potential increase from about 2 000 billion cubic meters in 1990 to not more than 3 300 billion cubic meters in 2010 even in a high economic development scenario NG consumption represents only one half of oil 1 9 billion TOE y as compared to 3 5 of oil Consequently in the future gas will exceed oil as a carbon atom source In the future the potential for getting energetic vectors or petrochemicals from NG will continue to grow The topics covered in Natural Gas Conversion V reflect the large global R D effort to look for new and economic ways of NG exploitation These range from the direct conversion of methane and light paraffins to the indirect conversion through synthesis gas to fuels and chemicals Particularly underlined and visible are the technologies already commercially viable These proceedings prove that mature and technologically feasible processes for natural gas conversion are already available and that new and improved catalytic approaches are currently developing

the validity and feasibility of which will soon be documented This is an exciting area of modern catalysis which will certainly open novel and rewarding perspectives for the chemical energy and petrochemical industries
