are many publications in this space no text has sought to provide an overview of quality in spine care Quality measurement and quality reporting are ever growing aspects of the healthcare environment Quality assessment is valuable to all healthcare stakeholders patients physicians facilities and payers Patients are drawn to facilities that provide high value care public reporting systems and grading systems for hospitals offer one opinion with regard to high quality care Most physicians email inboxes are inundated with offers of recognition for being a Top Doc for a nominal fee Some payers offer incentives to patients who chose to be treated at Centers of Excellence or similar facilities the definition of Excellence may be unclear There is little consensus on how to measure quality how to incorporate patient and procedure factors and achieve accurate risk adjustment and how to define value of care Regardless of these challenges regulatory efforts in the US as well as numerous international efforts make quality assessment and quality reporting an important part of physician behaviour Physician and facility reimbursement for procedures are often tied to quality metrics Spine procedures are costly elective and are a focus of many payer based programs Hence spine care is often a focus of quality reporting efforts This text summarizes the state of the art with regard to quality measurement reporting and value assessment in spine care We will review quality reporting in the US and internationally Chapters will outline how quality improvement efforts have achieved success in hospital systems The reader will be provided with insights in how to achieve success incorporating quality metrics into spine care Features 1 Illustrates the state of the art in spine quality reporting There is no text that thoroughly addresses quality assessment and quality reporting in spine care there are however numerous articles in this space This book provides a definitive text covering the state of the art for quality reporting in spine care and will be of value to the international orthopedic and neurosurgical spine community 2 Provides insight on quality reporting in different healthcare systems The text will allow for comparison of different quality reporting systems from different health care systems This will provide practitioners with insight into the strengths and weaknesses of different approaches to quality reporting and may drive improvement in quality assessment and reporting systems A single text that features review of US European and Australia Asian health care systems quality reporting is novel and will be thought provoking for readers 3 Describes the US and international Healthcare reimbursement systems Practicing physicians are provided with little information and less insight into the vagaries of the US and other healthcare systems The text will provide insight into code development valuation and how quality reporting affects physician reimbursement 4 Explains risk adjustment Appropriate risk adjustment and assessing patient and procedure factors that may impact quality reporting are invaluable to accurate quality measurement The text will review risk adjustment different approaches to risk assessment mitigation and provide physicians with insights into appropriate measures to capture in their clinical practices 5 Provides a foundation for improved quality assessment in spine care While there are many disparate elements and differing approaches to capturing spine quality metrics no definitive text has attempted to summarize these efforts in a single volume By synthesizing these variable approaches the reader may be

provided with insights into superior approaches to quality assessment and a foundation will be provided for improving healthcare systems
