Chemistry in Quantitative Language Christopher O. Oriakhi, 2009 Problem solving is one of the most challenging aspects students encounter in general chemistry courses leading to frustration and failure Consequently many students become less motivated to take additional chemistry courses after their first year This book deals with calculations in general chemistry and its primary goal is to prevent frustration by providing students with innovative intuitive and systematic strategies to problem solving in chemistry The material addresses this issue by providing several sample problems with carefully explained step by step solutions for each concept Key concepts basic theories and equations are provided and worked examples are selected to reflect possible ways problems could be presented to students Chemistry Trace Jordan, Neville R. Kallenbach, 2017 Chemistry The Molecules of Life offers chemical insights within the context of health pharmaceuticals and the function of biological molecules The contextualized presentation of topics gives students a broad introduction to chemistry and helps them to see the relevance of chemistry to their personal lives **Chemistry** John Olmsted, Greg Williams, Robert C. Burk, 2020 Chemistry 4th Edition is an introductory general chemistry text designed specifically with Canadian professors and students in mind A reorganized Table of Contents and inclusion of SI units IUPAC standards and Canadian content designed to engage and motivate readers and distinguish this text from other offerings It more accurately reflects the curriculum of most Canadian institutions Chemistry is sufficiently rigorous while engaging and retaining student interest through its accessible language and clear problem solving program without an excess of material and redundancy
