06. Another loudspeaker produces a sound of wavelength 0.40 m . Sound from the loudspeaker reaches a sound absorbing surface with a gap of width 0.80 m at the centre.

Fig. 5.1 shows the arrangement.

Fig. 5.1

Explain whether it is possible to detect sound from the loudspeaker at either point J or at point K.

point J very little to no sound as diffraction is very little due to the gap being larger than wavelength

point K sound detected as the wavelength travels straight through the gap passing point K

For a Voice and the Vote Lisa Anderson Todd, 2015-01-19 During the summer of 1964 hundreds of American college students descended on Mississippi to help the state's African American citizens register to vote. Student organizers, volunteers, and community members canvassed black neighborhoods to organize the Mississippi Freedom Democratic Party (MFDP), a group that sought to give a voice to black Mississippians and demonstrate their will to vote in the face of terror and intimidation. In *For a Voice and the Vote*, author Lisa Anderson Todd gives a fascinating insider's account of her experience volunteering in Greenville, Mississippi, during Freedom Summer when she participated in organizing the MFDP. Innovative and integrated, the party provided political education, ran candidates for office, and offered participation in local and statewide meetings for blacks who were denied the vote. For Todd, it was an exciting, dangerous, and life-changing experience. Offering the first full account of the group's five days in Atlantic City, the book draws on primary sources, oral histories, and the author's personal interviews of individuals who were supporters of the MFDP in 1964.

After the Flood Lydia Barnett, 2019-07-02 How the story of Noah's Flood was central to the development of a global environmental consciousness in early modern Europe. Winner of the Morris D. Forkosch Prize, *Journal of the History of Ideas*. Many centuries before the emergence of the scientific consensus on climate change, people began to imagine the existence of a global environment, a natural system capable of changing humans and of being changed by them. In *After the Flood*, Lydia Barnett traces the history of this idea back to the early modern period when the Scientific Revolution, the Reformation, the Little Ice Age, and the overseas expansion of European empire, religion, and commerce gave rise to new ideas about nature, humanity, and their intersecting histories. Recovering a forgotten episode in the history of environmental thought, Barnett brings to light the crucial role of religious faith and conflict in the emergence of a global environmental consciousness. Following Noah's Flood as a popular topic of debate through long-distance networks of knowledge from the late sixteenth through the early eighteenth centuries, Barnett reveals how early modern earth and environmental sciences were shaped by gender, evangelism, empire, race, and nation.

Cybersecurity Policies and Strategies for Cyberwarfare Prevention Richet, Jean-Loup, 2015-07-17 Cybersecurity has become a topic of concern over the past decade as private industry, public administration, commerce, and communication have gained a greater online presence. As many individual and organizational activities continue to evolve in the digital sphere, new vulnerabilities arise. *Cybersecurity Policies and Strategies for Cyberwarfare Prevention* serves as an integral publication on the latest legal and defensive measures being implemented to protect individuals as well as organizations from cyber threats. Examining online criminal networks and threats in both the public and private spheres, this book is a necessary addition to the reference collections of IT specialists, administrators, business managers, researchers, and students interested in uncovering new ways to thwart cyber breaches and protect sensitive digital information.
