Rozensky, Jerry J. Sweet, Steven M. Tovian, 2013-06-29 For two decades I have been responding to questions about the nature of health psychology and how it differs from medical psychology behavioral medicine and clinical psychology From the beginning I have taken the position that any application of psychological theory or practice to problems and issues of the health system is health psychology I have repeatedly used an analogy to Newell and Simon s General Problem Solver program of the late 1950s and early 1960s which had two major functional parts in addition to the executive component One was the problem solving core the procedural competence the other was the representation of the problem environment In the analogy the concepts knowledge and techniques of psychology constitute the core competence the health system in all its complexity is the problem environment A health psychologist is one whose basic competence in psychology is augmented by a working knowledge of some aspect of the health system Quite apparently there are functionally distinct aspects of health psychology to the degree that there are meaningful subdivisions in psychological competence and significantly different microenvironments within the health system I hesitate to refer to them as areas of specialization as the man who gave health psychology its formal definition Joseph Matarazzo has said that there are no specialties in psychology cited in the editors preface to this book **Museum Exhibitions and Suspense** Ariane Karbe, 2022-12-29 Museum Exhibitions and Suspense takes insights from screenwriting to revolutionise our understanding of exhibition curating Despite all genuine efforts to reach broader audiences museums persistently fear risking their credibility by becoming too popular Thus the enormous potential to learn from other storytelling forms more experienced in the field of entertainment remains essentially unexploited Museum Exhibitions and Suspense unlocks this creative potential A comparative in depth analysis of three

classical Hollywood films and three cultural historical exhibitions demonstrates how dramatic suspense techniques can be applied to exhibitions These techniques must be adapted to the typical epic character of the exhibition medium By differentiating between mild and wild suspense the book provides a new understanding of the nature of suspense itself Museum Exhibitions and Suspense addresses academics and students in the fields of museum studies gallery studies and heritage studies interested in how exhibitions function and in how to achieve dramaturgical effects like suspense It also appeals to scholars and students within film studies who want to gain a deeper understanding of suspense It provides an important resource for curators and other museum practitioners and scriptwriters who intend to create stories with a wide audience appeal

Friedrichsen, 2013-12-16 This volume begins with the general assumption that suspense is a major criterion for both an audience's selection and evaluation of entertaining media offerings This assumption is supported not only by the popularity of suspenseful narratives but also by the reasons users give for their actual choice of media contents Despite this there is no satisfying theory to describe and explain what suspense actually is how exactly it is caused by films or books and what kind of effect it has on audiences This book's main objective is to provide that theory by bringing together scholars from different disciplines who are working on the issue The editors' goal is to reflect the state of the art as much as it is to highlight and encourage further developments in this area There are two ways of approaching the problem of describing and explaining suspense an analysis of suspenseful texts or the reception process Researchers who follow the more text oriented approach identify the uncertainty of the narrative outcome the threat or danger for the protagonist the play with time delay or other factors as important and necessary for the production of suspense The more reception oriented scholar focuses on the cognitive activities of audiences readers' expectations the curiosity of onlookers their emotions and their relationships with the protagonists A correspondence between the two seems to be quite difficult though necessary to determine Both

perspectives are important in order to describe and explain suspense. Thus the editors utilize the thesis that suspense is an activity of the audience, reader, onlooker, etc., that is related to specific features and characteristics of the text, books, films, etc. Their question is: What kind of relation? The answer comes from finding out how, why, and which elements of the text cause effects that are experienced as suspense. Scholars from semiotics, literary criticism, cultural studies, and film theory assess the problem from a text-oriented point of view, dealing primarily with the how and which. Other scholars present the psychological perspective by focusing on the cognitive and emotional processes that underlie viewers' experience of suspense; that is, the reception theory tries to answer the question of why suspenseful texts may be experienced as they are.
