Class, Self, Culture
 Beverley Skeggs, 2013-11-05 Class Self Culture puts class back on the map in a novel way by taking a new look at how class is made and given value through culture It shows how different classes become attributed with value enabling culture to be deployed as a resource and as a form of property which has both use value to the person and exchange value in systems of symbolic and economic exchange The book shows how class has not disappeared but is known and spoken in a myriad of different ways always working through other categorisations of nation race gender and sexuality and across different sites through popular culture political rhetoric and academic theory In particular attention is given to how new forms of personhood are being generated through mechanisms of giving value to culture and how what we come to know and assume to be a self is always a classed formation Analysing four processes of inscription institutionalisation perspective taking and exchange relationships it challenges recent debates on reflexivity risk rational action theory individualisation and mobility by showing how these are all reliant on fixing some people in place so that others can move
