Health and Healing in the Classical Era

1. The Humoral System
2. The Medical Marketplace
3. Hippocratic Therapeutics

1. Humoral system is the thinking and content that underlay Hippocratic medicine – technical aspects of how Hippocratic practitioners and authors thought about bodies, health, and disease
 - a. They think about the body as containing and being made up of four fundamental bodily fluids – blood, yellow bile, black bile, and phlegm (four humors)
 - i. You eat food, digest it, then your body purifies it and eventually makes it into the four humors
 - ii. Health is balance of humors – you have a unique bodily constitution and thus a particular balance of humors
 - iii. Illness is imbalance of humors – changes in environment and lifestyle can change your balance of humors; the type of imbalance and your own personal constitution are going to determine the nature of disease
 - iv. Therapies aim to restore proper balance
 - v. Balance is *individual* to each person, but different peoples also follow their own general constitutions
 1. Greeks consider themselves to have the best general constitution – live in the best environment, have the best regimen, etc.
 - vi. The way that people thought of how the humors worked fit into a view of the universe that recognized a few fundamental elements that make up everything – air, fire, water, earth
 - vii. The elements' properties have to do with temperature and moisture
 - viii. Elements are associated with individual humors and these humors share the elemental properties
 - ix. In turn, elements and humors are associated with particular seasons that likewise share these qualities
 - b. Cornerstone of a system that dominates medical thought in the West for an incredibly long period of time
 - c. Diagnosis is not important to the Greeks in the sense of actually trying to figure out a name for the specific disease you have
 - d. What really matters to them is figuring out what the actual imbalance is – the nature of it (what you have too much or too little of and what your ideal balance is in order to remedy the imbalance)
 - i. Very imprecise about disease categories; want to know what's going on physiologically inside the body in terms of the humors
 - e. When we look at the Hippocratic text, we find that in general too much bile or too much phlegm tend to be the most common causes of illness
 - i. Weather can cause an overabundance of one over the other – environment
