Computational Science and Its Applications -- ICCSA 2015 Osvaldo Gervasi, Beniamino Murgante, Sanjay Misra, Marina L. Makulilo, 2016-11-30 This volume presents analyses of data protection systems and of 26 jurisdictions with data protection legislation in Africa as well as additional selected countries without comprehensive data protection laws In addition it covers all sub regional and regional data privacy policies in Africa Apart from analysing data protection law the book focuses on the socio economic contexts political settings and legal culture in which such laws developed and operate It bases its analyses on the African legal culture and comparative international data privacy law In Africa protection of personal data the central preoccupation of data privacy laws is on the policy agenda The recently adopted African Union Cyber Security and Data Protection Convention 2014 which is the first and currently the only single treaty across the globe to address data protection outside Europe serves as an illustration of such interest In addition there are data protection frameworks at sub regional levels for West Africa East Africa and Southern Africa Similarly laws on protection of personal data are increasingly being adopted at national plane Yet despite these data privacy law reforms there is very little literature about data privacy law in Africa and its recent developments This book fills that gap Finweek

,2006-07 **Research Universities in Africa** Cloete, Nico,Bunting, Ian,2018-11-09 From the early 2000s a new discourse emerged in Africa and the international donor community that higher education was important for development in Africa Within this zeitgeist of converging interests a range of agencies agreed that a different collaborative approach to linking higher education to development was necessary This led to the establishment of the Higher Education Research and Advocacy Network in Africa Herana to concentrate on research and advocacy about the possible role and contribution of universities to development in Africa This book is the final publication to emerge from the Herana project The project has also published more than 100 articles chapters reports manuals and datasets and many presentations have been delivered to share insights gained from the work done by Herana Given its prolific dissemination it seems reasonable to ask whether this fourth and final publication will offer the reader anything new This book is certainly different from previous publications in several respects First it is the only book to include an analysis of eight African universities based on the full 15 years of empirical data collected by the project Second previous books and reports were published mid project This book has benefited from an extended gestation period allowing the authors and contributors to reflect on the project without the distractions associated with managing and participating in a large scale project For the first time some of those who have been involved in Herana since its inception have had the opportunity to at least make an attempt to see part of the wood for the trees Different does not necessarily mean new An emphasis on the newness of the data and perspectives presented in this book is important because it shows that it is more than a historical record of a donor funded project Rather each chapter in this book brings to a lesser or greater extent something new to our understanding of universities research and development in Africa **ICICKM 2018 15th International Conference on Intellectual Capital Knowledge Management & Organisational Learning** Prof. Shaun Pather,2018-11-29 Towards new e-Infrastructure and e-Services for Developing Countries Rafik Zitouni,Amreesh Phokeer,Josiah Chavula,Ahmed Elmokashfi,Assane Gueye,Nabil Benamar,2021-03-03 This book constitutes the thoroughly refereed proceedings of the 12th International Conference on e Infrastructure and e Services for Developing Countries AFRICOMM 2020 held in Eb ne City Mauritius in December 2020 Due to COVID 19 pandemic the conference was held virtually The 20 full papers were carefully selected from 90 submissions The papers are organized in four thematic sections on dynamic spectrum access and mesh networks wireless sensing and 5G networks software defined networking Internet of Things e services and big data DNS resilience and performance **Urban Development in Asia and Africa** Yuji Murayama,Courage Kamusoko,Akio Yamashita,Ronald C. Estoque,2017-03-29 This book examines the urban growth trends and patterns of various rapidly growing metropolitan regions in developing Asian and African nations from the perspective of geography State of the art geospatial tools and techniques including geographic information system science and remote sensing were used to facilitate the analysis In addition to the empirical results the methodological approaches employed and discussed in this book showcase the potential of geospatial analysis e g land change modeling for improving

our understanding of the trends and patterns of urban growth in Asia and Africa Furthermore given the complexity of the urban growth process across the world issues raised in this book will contribute to the improvement of future geospatial analysis of urban growth in the developing regions This book is written for researchers academicians practitioners and graduate students The inclusion of the origin and brief history of each of the selected metropolitan regions including the analysis of their urban primacy spatiotemporal patterns of urban land use changes driving forces of urban development and implications for future sustainable development makes the book an important reference for various related studies

Global Security, Safety and Sustainability: Tomorrow's Challenges of Cyber Security Hamid Jahankhani, Alex Carlile, Babak Akhgar, Amie Taal, Ali G. Hessami, Amin Hosseinian-Far, 2015-09-03 This book constitutes the refereed proceedings of the 10th International Conference on Global Security Safety and Sustainability ICGS3 2015 held in London UK in September 2015 The 31 revised full papers presented were carefully reviewed and selected from 57 submissions The papers focus on the challenges of complexity rapid pace of change and risk opportunity issues associated with the 21st century living style systems and infrastructures *ECMLG 2019 15th European Conference on Management, Leadership and Governance* Professor Anabela Mesquita, Professor Paulino Silva, 2019-11-14 *Islamophobia and Psychiatry* H. Steven Moffic, John Peteet, Ahmed Zakaria Hankir, Rania Awaad, 2018-12-17 The book begins by covering the general and clinical challenges that are unique to Muslims drawing from an internationally ethnically and intergenerationally diverse pool of experts The text covers not only how psychiatrists and other clinicians can intervene successfully with patients but how we as clinicians can have a role in addressing other societally connected mental health challenges arising from Islamophobia The text addresses three related but distinct areas of interest Islamophobia as a destructive force Islam as a religion that is threatened by stigma and misinformation and the novel intersection of these forces with the field of psychiatry Islamophobia and Psychiatry is a vital resource for all clinicians and clinicians in training who may encounter patients struggling with these issues including adult and child psychiatrists psychologists primary care physicians counselors social workers and others **Assessing the Viva in Higher Education** Stephen Dobson, 2017-08-24 This book makes the case for a revival in interest in the viva As an oral assessment of a treatise or dissertation or of a student's performance in art or dance the viva has a long history dating back to the time of the Greeks It can be found today in the form of professional vocational and academic vivas where a judgment of oral performance is required to gain entry into a profession or community of scholars In a time when there are scandals about students selling essays to other students the viva provides a fertile ground for probing the student to see whether they are in fact the authors of the work being assessed and know its content and how to think cognitively or otherwise Given that we actually know so little about the viva the book theorises the viva based on a unique sample of vivas that have been filmed or in which the author himself has been participant and discusses why its format is so different in Anglo Saxon languages and Latin and other languages The book offers educational policy makers and examiners

a trade off between arguments in support of the viva and the demand for other ever more cost effective forms of assessment as the numbers of both undergraduate and postgraduate students threaten to increase It also argues that with demand in the labour market for qualified graduates who are better equipped with transferable skills such as the ability to communicate complex ideas verbally in a competent well argued fashion and not merely through the use of rhetoric what appear to be cost effective forms of assessment in the short run e g written exams with standardised questions or multiple choice may actually in the long run be of less value if we are investing in a future workforce with so called 21st century communication skills If the viva were abandoned the student would be robbed of the opportunity to stage a defence
