2015 Unisa Time Table:

The Origin and Growth of Geography as a discipline at South Africa Universities Gustav Visser, 2016-09-20 The publication provides the first comprehensive text that reflects on a century of the development of geography as an academic discipline at South African universities. The book showcases a broad and textured review of South Africa's geography departments, their staff members, their times, and the different Geographies they engaged in. The book lays the foundation from which more expansive individual departmental histories can be written in the future. ICEL 2015-10th International Conference on e-Learning Dr Carlton Watson, 2015-06-12 These proceedings represent the work of researchers participating in the 10th International Conference on e-Learning ICEL 2015 which is being hosted this year by the College of the Bahamas Nassau on the 25-26 June 2015. ICEL is a recognised event on the International research conferences calendar and provides a valuable platform for individuals to present their research findings, display their work in progress, and discuss conceptual advances in the area of e-Learning. It provides an important opportunity for researchers and managers to come together with peers to share their experiences of using the varied and expanding range of e-Learning available to them. With an initial submission of 91 abstracts, after the double-blind peer review process, there are 41 academic Research papers and 2 PhD papers. Research papers published in these Conference Proceedings. These papers come from some many different countries including Australia, Belgium, Brazil, Canada, China, Germany, Greece, Hong Kong, Malaysia, Portugal, Republic of Macedonia, Romania, Slovakia, South Africa, Sweden, United Arab Emirates, UK, and the USA. A selection of the best papers, those agreed by a panel of reviewers, and the editor will be published in a conference edition of EJEL, the Electronic Journal of e-Learning, www.ejel.com. These will be chosen for their quality of writing and relevance to the Journal's objective of publishing papers that offer new insights or practical help into the application of e-Learning. **ECSM 2017 4th European Conference on Social Media** Academic Conferences and Publishing Limited, 2017-07-03 Indo-Mozambicans in Maputo, 1947-1992 Nafeesah Allen, 2022-11-01 This book explores the experiences of Indo-Mozambicans, citizens and residents of Mozambique who can trace their origins to the Indian subcontinent, a region affected by competing colonialisms during the twentieth century. Drawing from ethnographic interviews, the author illustrates why migration developed as both an identity marker and a survival tool for Indo-Mozambicans living in Maputo in response to the series of independence movements and prolonged period of geo-political uncertainty that extended from 1947 to 1992. A unique examination of post-colonialism, the book argues that four pivotal moments in history forced migratory patterns and ethnic identity formations to emerge among Indo-Mozambicans: namely, the end of the British empire in India and the subsequent partition of India and Pakistan in 1947; the end of the Portuguese empire in India with the annexation of Goa, Daman and Diu in 1961; the independence of Mozambique from Portugal in 1975; and the civil war of Mozambique from 1977 to 1992. Framing these historical markers as trigger points for shifts in migration and identity formation, this book demonstrates the layered experiences of people subject to Portuguese

colonialism and highlights the important perspective of those left behind in migration studies

Implementing

Communities of Practice in Higher Education Jacquie McDonald, Aileen Cater-Steel, 2016-11-23 In this edited collection the authors pick up the communities of practice CoP approach of sharing practice in their reflection on the experience of taking their CoP vision from a dream to reality Their stories articulate the vision the passion and the challenge of working within and or changing existing institutional culture and practice The book discusses strategies that worked and considers the lessons learnt to inspire future dreamers and schemers The multiple perspectives provided in the case studies will assist higher education leaders as well as academic and professional staff in establishing or assessing CoPs The book offers insights into implementation strategies practical guidelines and ideas on how CoP theoretical underpinnings can be tailored to the higher education context

Activating Academia for an Era of Colliding Crises Alison Julia Katherine Green, Adam R. Aron, James Dyke, 2025-10-28 While there has been discussion for decades about the need to rethink the core purpose of academia to enable all to live well on a planet of finite resources humanity's present predicaments point to a paradox at the heart of the academic enterprise Although academic institutions have originated research and innovations that underpin much of what we view as development and progress these same advances are also responsible for the global crises we now face Indeed many voices are now arguing that academia can and must do more to drive the transformative change that is

needed if we are to avert the imminent catastrophe that is almost upon us The Alliance for Sustainability leadership in Education EAUC in conjunction with Second Nature and the United Nations Environment's Youth and Education Alliance announced in 2019 that over 7 000 higher and further education institutions across six continents were declaring a climate emergency with a three point plan for action as part of the Race to Zero This enshrined a bolder commitment from academia to play its part in achieving net zero greenhouse gas emissions While there has been success over several decades in fostering Education for Sustainable Development ESD and in embedding sustainability in curricula the efficacy of this has arguably been limited by the disciplinary silos in which academics find themselves Similarly the research and scholarly work that is needed to fully understand planetary limits transcends the traditional silos of academic disciplines This Research Topic then will examine what needs to change to optimise ESD and transdisciplinary approaches to research and teaching It will explore ways in which theories of change can be brought to bear on these issues Our Research Topic also centres on the responsibility acknowledged increasingly by academics for academic institutions and sectors and for academics themselves to do more As trusted educators communicators and policy influencers academia has unique potential and responsibility to guide students and society through this transition to a better future In the case of many academics this means embracing advocacy and activism as their moral responsibility at this point in humanity's history To this end the Research Topic will consider ways in which climate justice principles may be used to explore the responsibilities of academic institutions as one example of an actor with the capacity to influence the drivers of climate breakdown to act In some nations academic institutions have fallen prey to a set of neoliberal assumptions that have arguably diminished the agency of individual academics The marketisation of higher education is rife in some nations e.g UK and US and while some academics have documented rising inequality a deepening climate and ecological crisis socio economic breakdown and the deteriorating psychological and physical well being these engender they have so far proven mostly powerless to reorient their fields to confront these challenges at the institutional level Consequently they remain unable to pursue an agenda for change that benefits their students and wider society This Research Topic welcomes research that explores actions available to academics from diverse perspectives including models of behavioural change Decades of research have shown that warnings do not work and that evidence based recommendations do not necessarily translate into policy or institutional change Academics increasingly refer to a broken science society contract suggesting that calls to listen to the science and expectations that warnings issued by scientists will be heeded reflect a depoliticized view of the relationships between science and society This failure to recognise the intricate ways in which science and policy are connected raises questions about the neutrality of research and the academic enterprise Our Research Topic invites articles that explore how we might re make the science society contract Questions about the independence and interdependence of research and teaching inevitably arise when academic institutions are in receipt of funds from corporations charities foundations and individuals

Institutions can be compromised by vested interests often in the form of corporate interests that can influence research curriculum and staff appointments and the will of senior management to address this problem is poor While there are laudable initiatives aimed at resolving intersecting challenges and promoting transdisciplinary approaches in higher education it is fair to say that increasing numbers of academics globally realise that we are not set up to ready society for an era of colliding environmental and social crises Many fear that academia is guilty of perpetuating the problems that have created this crisis And while growing numbers hold this view few have ready answers as to what more academics and academic institutions can do In spite of this some academics have chosen to step outside of their conventional roles embracing advocacy and activism either taking individual action outside of their role or seeking to drive change within their institutions One problem is that action is fragmented often reliant upon the energies and tenacity of one or more individuals who have sought to re define their roles to embrace the responsibility they feel to act The Research Topic will serve to aggregate work on academic activism and to raise awareness of ways in which academics can act It will also examine the notion that we need to remake the science society contract and will explore what that entails The Research Topic will explore the interrelations between science and society and highlight the need to examine political dimensions of decision making and knowledge production To begin to provide answers to the questions of what it is that academics can do to drive transformational change this Research Topic brings together voices from diverse disciplines and nations Their voices have in common one thing each has reflected on or re imagined their role and purpose as an academic and each has embraced advocacy or activism The articles will be organised around three broad themes i In what ways are our academic institutions either failing or succeeding We invite articles that expose the overt and covert influences on academia such as neoliberal structures and fossil fueled research agendas We also invite articles centred on examples of good practice such as initiatives to foster transdisciplinary approaches to research and education ii Trailblazers for transformative change We invite case studies and critiques from the front lines from academics exploring and putting into practice their own take on What can I do Evaluations of what has and has not worked to drive change at the institutional and individual levels are welcomed iii The disruptors that are already initiating transformations in HE The growth of for profit private providers open access teaching resources and other online approaches that threaten the business models of existing public and nonprofit institutions who struggle to compete with the relevance and just in time education that is becoming available via novel actors We welcome articles exploring the potential for disruption

ICCWS 2019 14th International Conference on Cyber Warfare and Security Noëlle van der Waag-Cowling, Louise Leenen, 2019-02-28 **Global Adaptations of Community College Infrastructure** Gaulee, Uttam, 2018-09-07 Community colleges in America have evolved a great deal from the establishment of the first community college in Chicago 117 years ago The idea of American community colleges serves as a catalyst for connective solutions between industry college and the community on a global level Global Adaptations of Community College

Infrastructure provides emerging research on various contextual adaptations of the idea of the American community college as a connective solution to engaging community and industry This research will help any nation or state forge policies on adapting the concept toward democratization of economic opportunities for all individuals as opposed to the current elitist system of higher education Featuring coverage on a broad range of topics such as diploma pathway programs and the development of education institutions in various countries this book is ideally designed for academicians economic and educational policymakers higher education professionals and individuals engaged in expansion and democratization of post secondary education worldwide **Migration in Southern Africa** Pragna Rugunanan,Nomkhosi Xulu-Gama,2022-05-30

This open access Regional Reader proposes new ways of theorizing migration in Southern Africa by arguing that traditional western forms of theorizing do not adequately fit the South South migration context It explores the existing definitions of a migrant with a view to conceptualise a definition which will speak to the complexities envisioning a more inclusive Southern African region The book investigates the various levels of migration moving from the local rural to urban and urban to rural to cross border migration middle class versus working class migrant household livelihoods livelihoods procurement versus wage earning social capital networks and how they make meaning of their circumstances in a foreign space It also acknowledges the intertwined issues of gender and class as important in analyzing migration processes and the chapters feature both in varying dimensions As such the book provides a great resource for students academics and policy makers
