2016 Vaal Prospect:

Freshwater Challenges of South Africa and its Upper Vaal River Anja du Plessis, 2017-02-07 This book promotes better understanding and awareness of South Africa significant water problems by describing the country's and especially the Upper Vaal River's water resources. It is a go-to book for students, professionals, and regular citizens when information is required regarding the country's and more specifically the Upper Vaal River's freshwater resources. It highlights the major problems and risks which need to be addressed and give a realistic and true representation of the current water affairs.

Urbanization and Industrialization for Africa's Transformation, 2017 The 2017 Economic Report on Africa focuses on the linkages between industrialization and urbanization. Urbanization is one of Africa's mega trends with profound implications for the social, economic, environmental dimensions of growth and transformation. Theory and experience demonstrate that industrialization and urbanization can be mutually reinforcing processes. It is therefore imperative to explore the linkages between urbanization and industrialization given the profound implications for structural transformation in Africa. So far, current policy narratives and frameworks on structural transformation and industrialization in Africa have largely failed to factor in the spatial and urban dimensions of industrialization and in particular the advantages presented by productivity enhancement and agglomeration effects generated by cities. Yet the nexus between urbanization and industrialization is of particular relevance for Agenda 2063 and the 2030 Agenda on Sustainable Development. Both agendas recognize urbanization as a critical factor for sustainable development. It is also important to consider urbanization and industrialization in light of Africa's engagement with the Third United Nations Conference on Housing and Sustainable Urban Development Habitat III to be held in Quito, Ecuador, in October 2016. In this context, African policy makers have clearly recognized urbanization as an engine of structural transformation for inclusive and sustainable growth. *Rescaling municipal governance amidst political competition in Gauteng: Sedibeng's proposed re-demarcation* Themba Mkhize, 2021-08-27 In 2011 the Gauteng Provincial Government proposed that Sedibeng, a Category C district municipality located in the province, should be restructured. Although the original proposal had anticipated that this would happen after the 2016 local elections, the issue remains unresolved due largely to fierce party political opposition and vociferous protests against it on the ground. This Occasional Paper examines the dynamics, particularities, peculiarities, and challenges of re-demarcating the Gauteng City Region. While informed by technical reasons, the arguments for and against the merger have tended to gravitate more towards party political rationales for why the re-demarcation should or should not go ahead. Although these debates raise important merits and demerits for the proposal, they are difficult to disentangle from the interests of those whose fortunes would be changed by restructuring. In this environment, municipal demarcation risks being held hostage by party politics, with stakeholders such as political parties using any means at their disposal to have things go their way, including by scapegoating the Municipal Demarcation Board (MDB). The case of Sedibeng presents important lessons.

about attempts to make post transition local government and mechanisms for determining its configuration work for Gauteng It also highlights the need for strengthening and revising demarcation related legislation How can we make sure that the MDB functions effectively with respect to its primary goals *Afrotropical Streams and Rivers* Tatenda Dalu, Frank Masese, 2024-11-09 The *Afrotropical Streams and Rivers* Structure Ecological Processes and Management is a comprehensive guide that provides assessment of major rivers and tributaries in Africa Unlike other books available the editors present a thorough study of geomorphological hydrological biological and ecological processes incorporating a range of plant and animal communities while considering implications of human communities that depend upon them This book edited by a diverse cohort of researchers and or scholars is intended as an educational and practical guide for graduate students researchers and scientists who focus on the biodiversity conservation and management policy issues of the African river systems Provides a comprehensive introduction to African freshwater rivers their biota and abiotic processes Contains unique case studies on African streams and rivers Organised around an interdisciplinary approach that covers the complex aspects of conservation and management of African river systems on the continent *Social Constructions of Water Quality in South Africa* Suvania Naidoo, 2022-05-04 This book details how the water quality of the Blesbokspruit River in Gauteng South Africa was socially constructed by stakeholders and key individuals in the context of acid mine drainage AMD and its treatment Social constructionism is used as the framing for this research to explain how water is intrinsically social Findings presented here show that stakeholders are aware that the changes in the physicality of the Blesbokspruit resulted from human interventions and varied uses of the water over the years Such knowledge among factors such as the historical context of mining current coal mining flows and volumes of water technology used and processes followed information and communication and vested interests influence social constructions of the water quality What counts as the truth about water varies depending on the individual s perspective their purpose and their individual interests Further how one defines water quality influences what treatment processes are preferred in order to improve water quality The book explains why for example a treatment process meant to improve water quality gained a bad reputation by the public because of the South African government s silo approach The book explains how these social constructions are entrenched in power relations between stakeholders regarding AMD treatment and illustrates how power was used to influence decisions to improve the water quality of the Blesbokspruit The case presented in this book offers insights and recommendations for policymakers working in water governance including means to influence social constructions of water quality and ways to clarify roles and responsibilities in pursuit of improved cooperative government **Wawarsing Reformed Dutch Church, Ulster County, New York, 1745-1883, New Prospect Reformed Dutch Church, Ulster County, New York, 1816-1886, Bloomington Dutch Reformed Church, Ulster County, New York, 1796-1859, Newburgh Circuit, Methodist Episcopal Church, 1789-1834** Jean D. Disaster Studies Janki Andharia,2020-03-25 This book covers several dimensions of disaster studies as an emerging discipline It is the inaugural book in the series *Disaster Studies and Management* and deals with questions such as Is disaster management a field of practice a profession or simply a new area of study Exploring intersectionalities the book also examines areas of research that could help enhance the discourse on disaster management from policy and practice perspectives revisiting conventional event centric approaches which are the basis for most writings on the subject Several case studies and comparative analyses reflect a critical reading of research and practice concerning disasters and their management The book offers valuable insights into various subjects including the

challenge of establishing inter and multi disciplinary teams within the academia involved in disaster studies and sociological and anthropological readings of post disaster memoryscapes Each of the contributors has an enduring interest in disaster studies thus enriching the book immensely This book will be of interest to all the students and scholars of disaster studies and disaster management as well as to practitioners and policymakers

Subsoil Constraints for Crop Production

Teogenes Senna de Oliveira,Richard Willian Bell,2022-08-03 This book will address the major subsoil physical and chemical constraints and their implications to crop production Plant growth is often restricted by adverse physical and chemical properties of subsoils yet these limitations are not revealed by testing surface soils and hence their significance in crop management is often overlooked The major constraints can be physical or chemical Physical limitations such as poor nil subsoil structure sandy subsoils that do not provide adequate water or gravelly subsoils and etc On the other hand chemical constraints include acidity alkalinity high extractable Al or Mn low nutrient availability salts boron toxicity and pyritic subsoils Some of these constraints are inherent properties of the soil profile while others are induced by crop and soil management practices This aim of this book is to define the constraints and discuss amelioration practices and benefits for crop production This book will be of interest to readers involved with agriculture and soil sciences in laboratory applied or classroom settings

Remotely Sensed Rivers in the Age of Anthropocene

Subodh Chandra Pal,Uday Chatterjee,Martiw Diah Setiawati,Dipankar Ruidas,2025-05-02 This book offers a geospatial technology approach to data mining techniques data analysis modeling risk assessment and visualization as well as management strategies in many elements of river basin risks This book investigates cutting edge techniques based on open source software and R statistical programming Google Earth Engine and modeling in modern artificial intelligence techniques with a particular emphasis on recent trends in data mining techniques and robust modeling in river basin management It includes significant issues such as geomorphological hazards climate change catastrophic natural disasters meteorological and agricultural drought monitoring landslides or mudslides mudflow floods and flash floods soil erosion and land degradation This book s contents are of interest to earth and environmental scientists professionals and policymakers The book examines spatial modeling risk evaluation of a drainage basin in the domain of environmental and social issues management and associated research Due to poorly understood climate change and unclear man made activity there are several problems and uncertainties in studying earth s environmental circumstances making it exceedingly difficult to analyze and make knowledgeable judgments Many difficulties on the other hand are caused by mismanagement of present and future land water and forestry resources It is also critical to use new technology and methods to improve and reinforce environmental protection The link between the three devices namely remote sensing RS GIS and the R programming interface is acknowledged in this respect Land conservation measures soil and water quality control and new rules should all rely on correct measurements and predictions and three technologies RS GIS and R and open access quantitative forecasting methodologies help with climate change and better

management regulations Nonetheless this book serves as a feasible framework for studying current breakthroughs in geospatial artificial intelligence technologies and their relevance to the planet s environmental and socioeconomic concerns in a single volume The History of Geophysics in Southern Africa Johan H de Beer,2016-01-25 Geophysics is a comparatively young science which only evolved as a distinct discipline during the 19th century However its phenomena like earthquakes tsunamis volcanic eruptions and lightning had been objects of fear curiosity and speculation since ancient times In this book Johan de Beer and his research team reveal that geophysical activity in South Africa can be traced back to as early as 1488 This is a truly astonishing revelation which deserves to be firmly entrenched as part of the country s proud history The book also discusses the history and formation of South African geophysical institutions that made a huge and seldom acknowledged contribution to the technological development of southern Africa *Resilience in Energy, Infrastructure, and Natural Resources* Law Catherine Banet,Hanri Mostert,LeRoy Paddock,Milton Fernando Montoya,Milton Fernando Montoya Pardo,Iñigo del Guayo Castiella,Iñigo del Guayo,2022 Through a mix of thematic chapters and case studies this book offers an analytical approach to developing legal responses which will ensure the needs of present and future generations can be met through energy systems infrastructure development and natural resources management in times of increasingly frequent and disruptive nature based events **Chemistry for a Clean and Healthy Planet** Ponnadurai Ramasami,Minu Gupta Bhowon,Sabina Jhaumeer Laulloo,Henri Li Kam Wah,2019-09-03 These proceedings gather carefully selected peer reviewed contributions from the International Conference on Pure and Applied Chemistry ICPAC 2018 The event the latest installment in a biennial conference series was held in July 2018 in Mauritius The respective chapters in this unique collection reflect a wide range of fundamental and applied research in the chemical sciences and various interdisciplinary subjects In addition to reviews they highlight cutting edge advances **Limnology** Didem Gokce,2019-06-26 Anthropogenic influences such as changing climatic conditions domestic and industrial pollution eutrophication and salinization have great impacts on freshwater systems Nutrient cycling in freshwater ecosystems population dynamics and community structure water quality sustainability and management of ecosystem stability are increasingly important Establishing a management strategy using a multidisciplinary approach ensures the sustainability of water resources The present and future work being done in the field of limnology is necessary for preserving and protecting our freshwater ecosystems In this respect limnology is a rapidly developing science that has many significant aspects The scope of this book covers all aspects of freshwater environment studies from physical and chemical to biological limnology This book provides useful information on basic experimental and applied limnology to researchers and decision makers **Proceedings and List of Members** South African Chemical Institute,1937 *Rules for Trade in Services 2.0* Gabriel Gari,2024-06-24 This book explores the adaptating process of the General Agreement on Trade in Services GATS to a constantly changing trade and policy context The adoption of the General Agreement on Trade in Services GATS a

multilateral agreement with stand alone rules and principles for the governance of trade and investment in services represented a watershed in the history of global trade governance Over three decades after the drafting of the Agreement WTO Members struggle to deliver on the GATS mandate to achieve progressively higher levels of trade liberalisation in a radically different trade and policy landscape Against this background this book examines the contribution of the WTO negotiating adjudicative and deliberative functions to adapting the GATS to changing circumstances The book uncovers an extremely flexible and adaptable agreement whose full potential has yet to be realised due to a complex set of factors weighing more broadly on the use of the WTO functions The book distils the factors at play that constrain WTO Members capacity to adapt the Agreement to changing circumstances and explores potential pathways to overcome them The book will be of interest to scholars policy makers and trade diplomats interested in understanding the factors and processes conditioning the adaptation of a multilateral trade agreement to changing trade and policy circumstances

Water Crises and Sustainable Management in the Global South Sylvester Chibueze Izah, Matthew Chidozie Ogwu, Athanasios Loukas, Hossein Hamidifar, 2024 Zusammenfassung This book is a reference material on how to sustainably manage water crises The causes and effects of water crises under different regions in the Global South are explored in this book Approaches for the sustainable management of water crises are also highlighted in the book especially in the Global South where the level of technologies available for sustainable management of water are limited Water crisis is a global problem but with disproportionate higher consequences in the Global South About 25% of the global population resides in water stressed countries and about 10% of the world population lives in areas with high water vulnerability Furthermore many millions of people across the globe lack access to potable water supplies As such many people could be displaced by water crises or scarcity shortly The effects of the water crisis on the environment include increased salinity nutrient pollution the loss of floodplains the drying of riverbeds the loss of habitat wetlands disappearing and ecosystem loss On the human level it could lead to disease outbreaks drought famine and death This may have more severe effects in countries in the Global South as compared to nations in the Global North This is because the water cycle is very intense in Asia and Africa which are important areas in the Global South This book is of interest and useful to aquatic toxicologists water quality experts practitioners trainees and trainers environmentalists biological sciences scientists academics researchers students especially undergraduates and postgraduates libraries and other public knowledge repositories interested in novel and advanced practices in sustainable water management
