## **Alien Implant English Edition:**

UFOs Karl Svozil, 2023-08-01 Unidentified phenomena in space in the Earth's atmosphere and in waters are too important to leave their exploration to the military and scientific laypersons. Their proper scientific study is important for a variety of reasons: in particular, scientists and the public at large need to know the basic facts to be informed about the way evidence is recorded and to understand the difference between reliable evidence and fiction as well as between plausible explanations and fantasy. With this objective, the book surveys the history of UFO observations, the variety of recorded phenomena, and recounts the efforts of investigative commissions and their published findings. Although wild rumors are demystified in the process, this is not an exercise in rumor bashing. An open and at the same time critical mindset is the key. Many narratives and hypotheses appear implausible relative to our present state of knowledge, but this alone should not lead to their outright exclusion. Thus, the author also pays attention to UFO sightings that have so far eluded explanation in terms of known physics or meteorology. Here, the reader will encounter some of the more speculative but scientifically tenable proposals, for example, relating to sudden zigzag motion without apparent inertia or recognizable propulsion, yet always with a clear guide to their plausibility. Last but not least, the book outlines plans and suggestions for future research capable of revealing the existence and intentions of extraterrestrial intelligences, outer space engineers, or technologies so far known only from science fiction.

**Descriptive Translation Studies - and beyond** Gideon Toury, 2012-11-21 This is an expanded and slightly revised version of the book of the same title which caused quite a stir when it was first published in 1995. It thus reflects an additional step in an ongoing research project which was launched in the 1970s. The main objective is to transcend the limitations of using descriptive methods as a mere ancillary tool and place a proper branch of DTS at the very heart of the discipline between the theoretical and the applied branches. Throughout the book, theoretical and methodological discussions are illustrated by an assortment of case studies, the emphasis being on the need to take whatever one wishes to focus on within the contexts which are relevant to it. Part One discusses the pivotal position of the descriptive branch within Translation Studies, and Part Two then outlines a detailed rationale for that positioning. This in turn supplies a framework for the case studies comprising Part Three, where a number of exemplary issues are analysed and contextualized. Texts and modes of translational behaviour are situated in their cultural setting, and textual components are related to their texts and then also to the cultural constellations in which they are embedded. All this leads to Part Four, which asks what the knowledge accumulated through descriptive studies of the kind advocated in the book is likely to yield in terms of both the theoretical and the applied branches of the field. All in all, an innovative, thought-provoking book which no one with a keen interest in translation can afford to ignore.
