international poetry critics of our time **Poetry and Animals** Onno Oerlemans, 2018-03-06 Why do poets write about animals What can poetry do for animals and what can animals do for poetry In some cases poetry inscribes meaning on animals turning them into symbols or caricatures and bringing them into the confines of human culture It also reveals and revels in the complexity of animals Poetry through its great variety and its inherently experimental nature has embraced the multifaceted nature of animals to cross blur and reimagine the boundaries between human and animal In *Poetry and Animals* Onno Oerlemans explores a broad range of English language poetry about animals from the Middle Ages to the contemporary world He presents a taxonomy of kinds of animal poems breaking down the categories and binary oppositions at the root of human thinking about animals The book considers several different types of poetry allegorical poems poems about the animal broadly conceived poems about species of animal poems about individual animals or the animal as individual and poems about hybrids and hybridity Through careful readings of dozens of poems that reveal generous and often sympathetic approaches to recognizing and valuing animals difference and similarity Oerlemans demonstrates how the forms and modes of poetry can sensitize us to the moral standing of animals and give us new ways to think through the problems of the human animal divide *The Poetry of Animals* Gayle Paben, 2016-01-18 *Animals and Adaptations* The world is full of animals of all shapes and sizes Their interesting features are packed full of surprises They come fit with adaptations that help them to survive Nature has a way of helping creatures stay alive Whether mammal amphibian reptile fish or bird All have fascinating facts which you may have heard These remarkable and varied creatures live on land and sea So learn all about them as you read along with me Authors Website www.gaylepaben.com **Memorializing Animals during the Romantic Period** Chase Pielak, 2016-04-22 Early nineteenth century British literature is overpopulated with images of dead and deadly animals as Chase Pielak observes in his study of animal encounters in the works of Charles and Mary Lamb John Clare Samuel Taylor Coleridge Lord Byron and William Wordsworth These encounters Pielak suggests coincide with anxieties over living alongside both animals and cemeteries in the late eighteenth and early nineteenth centuries Pielak traces the linguistic physical and psychological interruptions occasioned by animal encounters from the heart of communal life the table to the countryside and finally into and beyond the wild cemetery He argues that Romantic period writers use language that ultimately betrays itself in beastly disruptions exposing anxiety over what it means to be human what happens at death the consequences of living together and the significance of being remembered Extending his discussion past an emphasis on animal rights to an examination of animals in their social context Pielak shows that these animal representations are both inherently important and a foreshadowing of the ways we continue to need images of dead and deadly Romantic beasts

Poetry and the Anthropocene Sam Solnick, 2016-09-19 This book asks what it means to write poetry in and about the Anthropocene the name given to a geological epoch where humans have a global ecological impact Combining critical approaches such as ecocriticism and posthumanism with close reading and archival research it argues that the Anthropocene

requires poetry and the humanities to find new ways of thinking about unfamiliar spatial and temporal scales about how we approach the metaphors and discourses of the sciences and about the role of those processes and materials that confound humans attempts to control or even conceptualise them Poetry and the Anthropocene draws on the work of a series of poets from across the political and poetic spectrum analysing how understandings of technology shape literature about place evolution and the tradition of writing about what still gets called Nature The book explores how writers understanding of sciences such as climatology or biochemistry might shape their poetry s form and how literature can respond to environmental crises without descending into agitprop self righteousness or apocalyptic cynicism In the face of the Anthropocene s radical challenges to ethics aesthetics and politics the book shows how poetry offers significant ways of interrogating and rendering the complex relationships between organisms and their environments in a world increasingly marked by technology
