HEALTH DISCLOSURE Adam Masters, 2013-10 A team of doctors and I figured out how to eliminate pain inflammation obesity disease and cancer to 5 basic elements of health arranged as a pyramid of priorities Pain inflammation and unhealthy weight are simply precursors to disease and obesity arranged in a sequence that begin at the precise point where 1 or more of the 5 imbalances occur All are symptoms of inflammation all are caused by imbalances in the pyramid I call the Matrix Where you are in the Matrix is measured by pH 7.2 being perfect By using the Matrix for anyone for any condition reverses and accelerates recovery past the point of curing to a point of thriving It makes pain inflammation obesity disease medication cancer and for most mental illness irrelevant That pyramid is the fulcrum point from where the sequence of obesity and disease begins You can stop and reverse ill health in its tracks by balancing the 5 elements at any point Blood only becomes alkaline pH 7.0-7.2 absent of inflammation to sustain life PH is the report card of the 5 elements that make up the Matrix pyramid of patient health The Matrix is the roadmap and the sequence is the path The difference between existing in a hospital bed requiring a walker living with a sore back to thriving can be manipulated by how much you invest in optimizing the 5 elements The easy part is prevention and cure for anyone of any disease Optimization and thriving is where this book wants to take you Profit has no incentive to change since profit is working well for individuals that currently control the system and doctors can't disclose this information without repercussions The trouble with the health care system is that it is driven by profit and not by incentive for cures Trauma care trained doctors are practicing health care and the symptom is sick care Treating symptoms intensifies problems because it ignores the factor of time Health Disclosure is about health care for the 21st century and its about time

future of urbanism and an emblematic new world city Singapore Wang contends is a fascinating site to explore how modernist sustainable urbanism is imagined and put into practice Drawing on field research this book explores distinct and intrarelated urban imaginaries situated in various sites from the futuristic authoritarian Supertree Grove positioned as a technologically sustainable solution to a velocity charged and singular urban transportation system to highly protected nature reserves and to the cemeteries where graves and memories continue to be exhumed and erased to make way for development Wang also attends to more contingent yet hopeful alternatives that aim to reconfigure current urban approaches In the face of growing enthusiasm for building high tech sustainable and natural cities Wang ultimately argues that urban imaginings must create space for a more relational understanding of urban environments
