 Lobster Charlotte Nassim, 2018-06-26 How forty years of research on thirty neurons in the stomach of a lobster has yielded
 valuable insights for the study of the human brain Neuroscientist Eve Marder has spent forty years studying thirty neurons
 on the stomach of a lobster Her focus on this tiny network of cells has yielded valuable insights into the much more complex
 workings of the human brain she has become a leading voice in neuroscience In Lessons from the Lobster Charlotte Nassim
 describes Marder s work and its significance accessibly and engagingly tracing the evolution of a supremely gifted scientist s
 ideas From the lobster s digestion to human thought is very big leap indeed Our brains selectively recruit networks from
 about ninety billion available neurons the connections are extremely complex Nevertheless as Nassim explains Marder s
 study of a microscopic knot of stomatogastric neurons in lobsters and crabs a small network with a countable number of
 neurons has laid vital foundations for current brain research projects Marder s approach is as intuitive as it is analytic but
 always firmly anchored to data Every scrap of information is a pointer for Marder her discoveries depend on her own creative
 thinking as much as her laboratory s findings Nassim describes Marder s important findings on neuromodulation the secrets
 of neuronal networks and homeostasis Her recognition of the importance of animal to animal variability has influenced
 research methods everywhere Marder has run her laboratory at Brandeis University since 1978 She was President of the
 Society for Neuroscience in 2008 and she is the recipient of numerous awards including the 2016 Kavli Award in
 Neuroscience and the 2013 Gruber Prize in Neuroscience Research that reaches the headlines often depends on technical
 fireworks and especially on spectacular images Marder s work seldom fits that pattern but this book demonstrates that a
 brilliant scientist working carefully and thoughtfully can produce groundbreaking results **Outlines of Practical
