Surreal Entanglements Louise Economides, Laura Shackelford, 2021-05-18 This edited collection approaches the most pressing discourses of the Anthropocene and posthumanist culture through the surreal yet instructive lens of Jeff VanderMeer's fiction In contrast to universalist and essentializing ways of responding to new material realities VanderMeer's work invites us to re imagine human subjectivity and other collectivities in the light of historically unique entanglements we face today the ecological technological aesthetic epistemological and political challenges of life in the Anthropocene era Situating these messy multi scalar material complexities of life in close relation to their ecological material and colonialist histories his fiction renders them at once troublingly familiar and strangely generative of other potentialities and insight The collection measures VanderMeer's work as a new kind of speculative surrealism his texts capturing the strangeness of navigating a world in which nature has become radically uncanny due to global climate change and powerful bio technologies The first collection to survey academic engagements with VanderMeer this book brings together scholars in the fields of environmental literature science fiction genre studies American literary history philosophy of technology and digital cultures to reflect on the environmentally culturally aesthetically and politically central questions his fiction poses to predominant understandings of the Anthropocene

Transformed States Martin Halliwell, 2024-11-15 *Transformed States* offers a timely history of the politics ethics medical applications and cultural representations of the biotechnological revolution from the Human Genome Project to the COVID 19 pandemic In exploring the entanglements of mental and physical health in an age of biotechnology it views the post Cold War 1990s as the horizon for understanding the intersection of technoscience and culture in the early twenty first century The book draws on original research spanning the presidencies of George H W Bush and Joe Biden to show how the politics of science and technology shape the medical uses of biotechnology Some of these technologies reveal fierce ideological conflicts in the arenas of cloning reproduction artificial intelligence longevity gender affirmation vaccination and environmental health Interweaving politics and culture the book illustrates how these health issues are reflected in and challenged by literary and cinematic texts from *Oryx* and *Crake* to *Annihilation* and from *Gattaca* to *Avatar* By assessing the complex relationship between federal politics and the biomedical industry *Transformed States* develops an ecological approach to public health that moves beyond tensions between state governance and private enterprise To that end Martin Halliwell analyzes thirty years that radically transformed American science medicine and policy positioning biotechnology in dialogue with fears and fantasies about an emerging future in which health is ever more contested Along with the two earlier books *Therapeutic Revolutions* 2013 and *Voices of Mental Health* 2017 *Transformed States* is the final volume of a landmark cultural and intellectual history of mental health in the United States journeying from

the combat zones of World War II to the global emergency of COVID 19 **The American Climate Emergency Narrative** Johan Höglund,2024-07-19 The American Climate Emergency Narrative reveals how much of what has been called climate fiction casts ecological breakdown as an emergency for American capitalist modernity rather than for the planet The book traces the origins of this narrative back to the arrival of settler capitalism in America when the understanding of the planet and its people as extractable resources was established Since then this narrative has elided the violent history of the climate crisis while at the same time leveraging the military as a bulwark against the crises capitalism has caused the people it has uprooted even the ailing planet itself This is an open access book *Tattooed Bodies* James Martell,Erik Larsen,2022-01-20 The essays collected in *Tattooed Bodies* draw on a range of theoretical paradigms and empirical knowledge to investigate tattoos tattooing and our complex relations with marks on skin Engaging with diverse disciplinary perspectives in art history continental philosophy media studies psychoanalysis critical theory literary studies biopolitics and cultural anthropology the volume reflects the sheer diversity of meanings attributed to tattoos throughout history and across cultures Essays explore conceptualizations of tattoos and tattooing in Derrida Deleuze and Guattari Lacan Agamben and Jean Luc Nancy while utilizing theoretical perspectives to interpret tattoos in literary works by Melville Beckett Kafka Genet and Jeff VanderMeer among others *Tattooed Bodies* prompts readers to explore a few significant questions Are tattoos unique phenomena or an art medium in need of special theoretical exploration If so what conceptual paradigms and theories might best shape our understanding of tattoos and their complex ubiquity in world cultures and histories **Existential Science Fiction** Ryan Lizardi,2022-01-05 This book explores contemporary existential science fiction media including film television and video games and their influence on society's conceptions of memory identity and humanity Most poignantly Ryan Lizardi argues are the ways in which a recent cluster of science fiction media including *Gravity* 2013 *Interstellar* 2014 *Legion* 2017 2019 *Westworld* 2016 present *SOMA* 2015 and *Death Stranding* 2019 among others present a vision of the future that is inextricably tied to an exploration of humanity that is more contemplative and comparative than traditional science fiction The combination of the existential nature of this current trend in science fiction with the genre's ability to manifest these abstract concepts in a generic environment that is historically focused on new frontiers and ideas creates a powerful set of media texts that ask audiences to contemplate what it means to exist think and connect as human beings Scholars of media studies film studies television studies genre studies and philosophy will find this book particularly useful *Focus On: 100 Most Popular American Science Fiction Films* Wikipedia contributors, *Haunted Nature* Sladja Blazan,2021-12-08 This volume is a study of human entanglements with Nature as seen through the mode of haunting As an interruption of the present by the past haunting can express contemporary anxieties concerning our involvement in the transformation of natural environments and their ecosystems and our complicity in their collapse It can also express a much needed sense of continuity and relationality The complexity of the question who and what gets to be called human with respect to the

nonhuman is reflected in these collected chapters which in their analysis of cinematic and literary representations of sentient Nature within the traditional gothic trope of haunting bring together history race postcolonialism and feminism with ecocriticism and media studies Given the growing demand for narratives expressing our troubled relationship with Nature it is imperative to analyze this contested ground Chapter 6 is available open access under a Creative Commons Attribution 4.0 International License via link [springer.com](https://www.springer.com)

Death by Landscape Elvia Wilk, 2022-07-19 From the acclaimed author of the novel *Oval* comes a book of fan nonfiction about living and writing in the age of extinction In this constellation of essays Elvia Wilk asks what kinds of narratives will help us rethink our human perspective toward Earth The book begins as an exploration of the role of fiction today and becomes a deep interrogation of the writing process and the self Wilk examines creative works across time and genre in order to break down binaries between dystopia and utopia real and imagined self and world She makes connections between works by such wide ranging writers as Mark Fisher Karen Russell Han Kang Doris Lessing Anne Carson Octavia E Butler Michelle Tea Helen Phillips Kathe Koja Jeff and Ann VanderMeer and Hildegard von Bingen What happens when research becomes personal when the observer breaks through the glass Through the eye of the fan this collection delves into literal and literary world building projects medieval monasteries solarpunk futures vampire role plays environments devoid of humans bridging the micro and the macro and revealing how our relationship to narrative shapes our relationships to the natural world and to one another

The Cambridge Companion to Environmental Humanities Jeffrey Cohen, Stephanie Foote, 2021-09-02 Offers a comprehensive introduction to the environmental humanities It addresses the 21st century recognition of an environmental crisis

The Cross, the Plow and the Skyline Ernest J. Yanarella, 2022-03-01 The apocalyptic pastoral and urban traditions have fundamentally shaped Western history and influenced American religion culture and politics This book argues that these traditions have not only been decisive in giving form and substance to classic and modern American literature but have been appropriated by contemporary science fiction As a loosely connected set of cultural narratives the Cross the Plow and the Skyline have through the medium of science fiction and fantasy provided a bold vista on the future grounded in an emergent ecological imagination In the expanded second edition of the original 2001 publication the author argues that a significant shift has taken place in contemporary Anglo American science fiction and fantasy SF F from twentieth century SF F critically analyzed in the first edition's critical inquiry Avantgarde works in twenty first century speculative fiction extensively examined in representative works in interludes separating the slightly revised original chapters have become darker in their visions of the possible future more focused on slowness over breakneck speed more amenable to gender racial and global diversity in authorship plot and subgenre creation less attached to anchor concepts like the city wilderness and the domesticated landscape in plot development more prone to dystopian and critical dystopian tropes simultaneously more open toward but critical of Young Adult fiction and more supportive of the breakdown of borders and antagonisms between science fiction and fantasy and SF

F and literary fiction Ensnared in the cultural social and political zeitgeist of the New Millennium's first two decades these features of twenty first century science fiction and fantasy may yet settle into and inform emergent and pluralistic varieties of ecological politics spreading across the globe and confronting the Earth's social and environmental crises of our times and coming decades *The Cambridge Companion to Literature and the Anthropocene* John Parham, 2021-06-17 From

catastrophe to utopia the most comprehensive survey yet of how literature can speak to the Anthropocene **Animal Husbandry: Bestiality in Medieval Culture**, 2025-08-28 How was bestiality perceived in the Middle Ages The answer is far from simple Depending on the context it might be a kingmaking ritual a boy's game a pact with the devil a peccadillo or a capital offense As dangerous as it could be to be suspected by one's own neighbors of committing bestiality medieval literature and art are full of often exhilarating erotic interspecies encounters In the end this volume suggests that there is a zoophilic streak in all humans the medievals as well as ourselves Contributors are Crystal Beamer Bailey Flannery Katherine Leach Marian E Polhill Anna Russakoff Joyce E Salisbury Andrea Schutz Jacqueline A Stuhmiller Larissa Tracy and Tess Wingard

Narrating the Mesh Marco Caracciolo, 2021-02-26 A hierarchical model of human societies' relations with the natural world is at the root of today's climate crisis Narrating the Mesh contends that narrative form is instrumental in countering this ideology Drawing inspiration from Timothy Morton's concept of the mesh as a metaphor for the human/nonhuman relationship in the face of climate change Marco Caracciolo investigates how narratives in genres such as the novel and the short story employ formal devices to effectively channel the entanglement of human communities and nonhuman phenomena How can narrative undermine linearity in order to reject notions of unlimited technological progress and economic growth What does it mean to say that nonhuman materials and processes from contaminated landscapes to natural evolution can become characters in stories And conversely how can narrative trace the rising awareness of climate change in the thick of human characters' mental activities These are some of the questions Narrating the Mesh addresses by engaging with contemporary works by Ted Chiang Emily St John Mandel Richard Powers Jeff VanderMeer Jeanette Winterson and many others Entering interdisciplinary debates on narrative and the Anthropocene this book explores how stories can bridge the gap between scientific models of the climate and the human scale world of everyday experience powerfully illustrating the complexity of the ecological crisis at multiple levels *Eco-Theory and Annihilation* Evan

Gottlieb, 2025-03-06 Eco theory and Annihilation is part of the Film Theory in Practice series which blends the explanation of a film theory with the interpretation of a film and provides discrete examples of how film theory can serve as the basis for textual analysis This book offers a concise introduction to eco theory in jargon free language and shows how this theory can be deployed to interpret Alex Garland's controversial film adaptation of Jeff VanderMeer's hit novel Annihilation Eco theory is one of the most exciting and timely offshoots of contemporary critical theory but it is too frequently treated as only a recent development Covering historical developments in nature philosophy geology and organic chemistry as well as contemporary

critical methodologies like systems theory and new materialism Eco Theory and Annihilation introduces readers to the full extent of eco theory's lively variations as well as investigates the complications that arise when those variations are mediated by the generic expectations of filmic science fiction This book illuminates the deep history of eco theory maps its contemporary coordinates and demonstrates how it can shed light on Garland's provocative eco sci fi thriller [Braille Book Review](#) ,2016
