Meghanathan, Natarajan, 2017-07-13 Social network analysis has created novel opportunities within the field of data science The complexity of these networks requires new techniques to optimize the extraction of useful information Graph Theoretic Approaches for Analyzing Large Scale Social Networks is a pivotal reference source for the latest academic research on emerging algorithms and methods for the analysis of social networks Highlighting a range of pertinent topics such as influence maximization probabilistic exploration and distributed memory this book is ideally designed for academics graduate students professionals and practitioners actively involved in the field of data science *Web-based Learning: Men And Machines - Proceedings Of The First International Conference On Web-based Learning In China (Icwl 2002)* Jimmy Sun Fat

Chan, Ronnie Chu Ting Cheung, Anthony Fong, Wei-jia Jia, Reggie Kwan, 2002-07-15 This book provides an up to date study of technical pedagogical and managerial issues in Web based learning The successful application of Web based learning provides enhancements in workforce performance helps to lower costs and encourages innovation for Web based and distance learning It presents a selection of 20 refereed papers given at the First International Conference on Web Based Learning from over 70 submissions by academic researchers and industry developers from 19 different countries It provides an excellent resource for students researchers and practitioners involved in Web based learning The proceedings have been selected for coverage in Index to Scientific Technical Proceedings ISTP CDROM version ISI Proceedings Index to Social Sciences Humanities Proceedings ISSHP ISI Proceedings Index to Social Sciences Humanities Proceedings ISSHP CDROM version ISI Proceedings **Informal Social Protection and Poverty** Zahid Mumtaz, 2022-10-04 This book analyzes the

importance of informal social protection provided by religious institutions such as madrassas in a low income country such as Pakistan This book explains that Madrassas are religious schools that have existed in many Muslim countries for centuries and contributed significantly to preserving forming and extending human knowledge in medieval times Further madrassas are now more commonly viewed as the providers of a narrow education supporting religious fundamentalism that may lead to terrorism However this book asserts that education is not the only function performed by madrassas They are a significant source of welfare support for the vulnerable and marginalized households in many low income countries This book helps the readers to understand the concept of informal social protection not conceptualized previously In addition its various

attributes and institutions providing such a form of welfare worldwide are explained in detail analyzing the usefulness of such a form of social protection would benefit readers of social policy national governments and international donor aid agencies This book also provides a prescriptive framework for integrating formal and informal social protection This book provides a new Multiple Regime Framework for identifying various regimes in one country at one point in time by applying a novel data collection and analysis methodology The application of this framework would be of particular interest to social policy scholars national governments and donor aid agencies because it will result in better targeting of social protection policies in the wake of fiscal constraints Lastly this book provides a novel data collection and analysis strategy that will benefit the reader of research methodology development consultants donor agencies and policy practitioners interested in using artificial intelligence to make informed and targeted policy decisions *Computational Network Science* Henry Hexmoor,2014-09-23 The emerging field of network science represents a new style of research that can unify such traditionally diverse fields as sociology economics physics biology and computer science It is a powerful tool in analyzing both natural and man made systems using the relationships between players within these networks and between the networks themselves to gain insight into the nature of each field Until now studies in network science have been focused on particular relationships that require varied and sometimes incompatible datasets which has kept it from being a truly universal discipline Computational Network Science seeks to unify the methods used to analyze these diverse fields This book provides an introduction to the field of Network Science and provides the groundwork for a computational algorithm based approach to network and system analysis in a new and important way This new approach would remove the need for tedious human based analysis of different datasets and help researchers spend more time on the qualitative aspects of network science research Demystifies media hype regarding Network Science and serves as a fast paced introduction to state of the art concepts and systems related to network science Comprehensive coverage of Network Science algorithms methodologies and common problems Includes references to formative and updated developments in the field Coverage spans mathematical sociology economics political science and biological networks **The British National Bibliography** Arthur James Wells,2009
