Narrative Framing in Contemporary American Novels Sławomir Studniarz, 2017-05-11 This volume examines a range of novels and novellas published over the course of nearly forty years from 1968 to 2014 including E L Doctorow s Andrew s Brain John Gardner s The King s Indian Paul Auster s Travels in the Scriptorium Peter Straub s Mr X and Joyce Carol Oates Expensive People These texts display one crucial unifying thread they are doubly mediated fictions fictions in parentheses so to speak The application of narrative framing and embedding has been commonly acknowledged and abundantly researched in various works belonging to the Western literary heritage However its use in the twentieth and twenty first century fiction has not been adequately explored perhaps with the exception of the literary creations of such giants as Vladimir Nabokov and John Barth Despite this critical oversight narrative frames prove to be a major resource for modern day novelists who adapt this literary device and very effectively put it to their own uses The essays collected in this volume will serve to spark the revival of interest in this time honored narrative tool demonstrating its validity for research into more recently created novels

Towards an Ecology of Brain R. Walsh, 2012-12-06 Let us then consider for a moment the world as described by the physicist It consists of a number of fundamental particles which appear bound by certain natural laws which indicate the form of their relationship_ Now the physicist himself who describes all this is in his own account himself constructed of it He is in short made of a conglomeration of the very particulars he describes no more no less bound together by and obeying such general laws as he himself has managed to find and to record Thus we cannot escape the fact that the world we know is constructed in order and thus in such a way as to be able to see itself This is indeed amazing Not so much in view of what it sees although this may appear fantastic enough but in respect of the fact that it can see at all But in order to do so evidently it must first cut itself up into at least one state which sees and at least one other state which is seen In this severed and mutilated condition what ever sees is only partially itself We may take it that the world undoubtedly is itself i e is indistinct from itself but in any attempt to see itself as an object it must equally undoubtedly act so as to make itself distinct from and therefore false to itself In this condition it will always partially elude itself *Charles Johnson's Novels* Rudolph P.
