On the Role of Contrast in Information Structure Jorina Brysbaert, Karen Lahousse, 2024-06-04

In research on Information Structure there is an ongoing discussion about the role of contrast While most linguists consider contrast to be compatible with both focus and topic some argue that it is an autonomous IS category Contrast has been shown to be encoded by different linguistic means such as specific morphemes adverbials clefts prosodic cues Hence this concept is also related to other domains in particular morphosyntax and prosody The precise way in which they interact is however not yet entirely clear Moreover from a methodological point of view the identification and annotation of contrast in corpora is not straightforward This volume provides a selection of articles discussing the definition of contrast the importance of distinguishing different types of contrast the use of several encoding strategies and the annotation of contrast in corpora using the Question Under Discussion Model The contributions offer data on English French French Belgian Sign Language German Hindi Italian and Spanish

When Data Challenges Theory Davide Garassino, Daniel Jacob, 2022-02-15

This volume offers a critical appraisal of the tension between theory and empirical evidence in research on information structure The relevance of unexpected data taken into account in the last decades such as the well known case of non focalizing cleft sentences in Germanic and Romance has increasingly led us to give more weight to explanations involving inferential reasoning discourse organization and speakers rhetorical strategies thus moving away from sentence based perspectives At the same time this shift towards pragmatic complexity has introduced new challenges to well established information structural categories such as Focus and Topic to the point that some scholars nowadays even doubt about their descriptive and theoretical usefulness This book brings together researchers working in different frameworks and delving into cross linguistic as well as language internal variation and language contact Despite their differences all contributions are committed to the same underlying goal appreciating the relation between linguistic structures and their context based on a firm empirical grounding and on theoretical models that are able to account for the
