1871 perhaps the world's first female photographer and a pioneer of the medium. She lived an existence full of heartache and triumph from her mother's death when Atkins was an infant to her publication of multiple photographic books as an adult. After the passing of her mother, Atkins was raised primarily by her father and grandfather who placed an emphasis on both her emotional and intellectual growth. As a result, she spent her life surrounded by some of the brightest minds of Victorian England during the Industrial Revolution. Despite societal gender norms of the time which typically limited women to a life within the home, Atkins gained the respect of the scientific community with her ambitious multivolume album *Photographs of British Algae: Cyanotype Impressions*, now recognized as the world's first photographically illustrated book. Her cyanotypes, in addition to their scientific accuracy, lent artistic beauty to her publications, setting the stage for new uses of this experimental technology. In an era replete with state-of-the-art inventions and innovative ideas, Atkins pushed photography forward in its earliest days with courage, creativity, and brilliance.

Contemporary Perspectives in Philosophy and Methodology of Science Wenceslao J. González, 2006. Nowadays, philosophy and methodology of science appear as a combination of novelty and continuity. This blend is clear both in the general approaches to science, those thought of as any science, and in the specific perspectives on every science, either formal or empirical. There are new topics for philosophical reflection, such as key issues in philosophy of medicine and central problems raised by neuroscience. Thus, new contents have brought attention to aspects that previously went almost unnoticed. In addition, there are new angles for philosophical study, such as the repercussion of society on scientific activity, in aims, processes, and results. But the background of the main philosophical and methodological trends of the twentieth century is in many ways still in place.
